The Legislative Council, which is composed of five Senators, six Representatives, and the presiding officers of the two houses, serves as a continuing research agency for the legislature through the maintenance of a trained staff. Between sessions, research activities are concentrated on the study of relatively broad problems formally proposed by legislators, and the publication and distribution of factual reports to aid in their solution.

During the sessions, the emphasis is on supplying legislators, on individual request, with personal memoranda, providing them with information needed to handle their own legislative problems. Reports and memoranda both give pertinent data in the form of facts, figures, arguments, and alternatives.

To Members of the Forty-sixth Colorado General Assembly:

In accordance with the provisions of Senate Joint Resolution No. 8, 1966 regular session, the Legislative Council submits the accompanying report on state aid to schools in Colorado.

The committee appointed by the Legislative Council to conduct the study reported its findings and recommendations to the Council on November 28. At that time the report was adopted by the Legislative Council for transmission to the Forty-sixth General Assembly.

Respectfully submitted,

/s/ Senator Floyd Oliver
Chairman

Dear Mr. Chairman:

Your committee appointed to study state aid to schools has completed its assignment and submits herewith its final report and recommendations.

The committee has made three recommendations for statutory changes: (1) an increase in the per pupil grants from the Property Tax Relief Fund; (2) an amendment to the provision for small attendance center aid; and (3) a change in the percentage required for eligibility under the excess growth provision.

Respectfully submitted,

/s/ Senator Fay DeBerard, Chairman
Committee on State Aid to Schools

FOREWORD

The Legislative Council's Committee on State Aid to Schools was created under the provisions of House Joint Resolution No. 1024, 1965 regular session, and continued pursuant to Senate Joint Resolution No. 8, 1966 regular session. The committee was directed to conduct a study of the purposes, accomplishments, and goals of the over-all program of state support for public schools in Colorado. Committee members included:

Sen. Fay DeBerard, Chairman
Rep. Forrest G. Burns, Vice Chairman
Sen. Roger Cisneros
Sen. Clarence Decker
Sen. Harry M. Locke
Sen. Andy Lucas
Sen. Ruth S. Stockton
Sen. James P. Thomas
Sen. Anthony F. Vollack

Rep. Harold W. Adcock
Rep. Palmer L. Burch
Rep. Ruth B. Clark
Rep. Charles Conklin
Rep. Wayne N. Knox
Rep. C. P. Lamb
Rep. Clarence Quinlan

Representative D. H. Arnold served on the committee prior to his death in 1966.

The committee and staff were greatly assisted throughout the two-year study by the State Department of Education. Special thanks go to Dr. Byron Hansford, Commissioner of Education; Dr. Elbie Gann, who was Assistant Commissioner for Administrative Services until September of 1966; Dr. Ray McGuire, who succeeded Dr. Gann as Assistant Commissioner for Administrative Services; and Mr. Charles Hathaway of the Division of Finance and Statistics. Miss Clair Sippel, secretary of the Legislative Reference Office, and Miss Janet Wilson, senior research analyst from the Legislative Council's staff, also assisted the committee.

November, 1966

Lyle C. Kyle
Director

STATE AID TO SCHOOLS IN COLORADO

Since the adoption of the original Foundation Act in 1957 numerous committees have studied the problems related to school aid but have tended to concentrate on the question of how much state aid could be provided and how that money should be apportioned to the schools. The Committee on State Aid to Schools this year commenced its study with a new approach.

This year the committee was anxious to look at what our schools should be doing in the way of providing an acceptable educational program for all boys and girls in the state of Colorado. The committee requested the State Department of Education to prepare a description of a poor, an acceptable, and superior educational program as illustrated by current programs in the state. This the Department did and the committee agreed that the acceptable level should be the level to which the state support program should be geared.

Subsequently, the Department was asked to suggest a new school finance program to achieve this acceptable level throughout the state, along with estimates of the total cost and the dollar effect on each school district. It was at this stage that the committee's original objective came into absolute conflict with the fiscal facts of life and it was further complicated by Proposed Constitutional Amendment No. 5. Consequently, the committee has again fallen into the same groove that previous study committees have found themselves in and thus is recommending merely dollar increases again without achieving an acceptable level of equality of educational opportunity throughout the state.

The committee is convinced that its study of the various aspects of school finance in Colorado has been worthwhile to all concerned. The members of the committee, the Legislative Council staff, the State Department of Education, and local school administrators and boards of education have all benefited from the ideas and statistics developed and discussed during the last two years, even though major revisions in school aid programs are not recommended at this time. The committee anticipates that the information in the accompanying report will provide the groundwork for the next revision of the state school support program. Such a revision cannot occur until the General Assembly is willing to increase state funds to implement a revision that will shift a larger percentage of the cost of schools from the property tax to the broader state base.

Proposed Constitutional Amendment No. 5

The committee was not able to chart its course with certainty during the last few months of the study because of the pending vote on a proposed constitutional amendment which would have placed a limit on local property taxes and reduced the property tax base.

Amendment No. 5 would have had drastic and far-reaching effects on school finance if it had been adopted. The property tax limitation portion of the amendment was of particular concern to the committee. It would have taken effect on January 1, 1968, and would have established an over-all annual property tax limitation of $2\frac{1}{4}$ per cent of actual value (75 mills based on the present statutory 30 per cent valuation for assessment) unless a greater maximum limitation were approved by the taxpaying electors. With the exception of bond and interest levies and levies for state purposes, all property taxes would have been subject to the limitation, including taxes for school districts, municipalities, counties, and special districts.

Even though Amendment No. 5 was turned down by the voters on November 8th, the mere fact that it was placed on the ballot by petition and received considerable support at the polls is a good indication that the General Assembly must face up to the necessity of relieving the property tax pressure, particularly on schools.

Committee Recommendations

The following recommendations are based on the committee's estimate of the state's present financial situation and the conclusion that a modest increase in school aid is possible at this time. The recommendations also reflect the fact that the committee has not arrived at any firm conclusions on how additional state revenues should be obtained in order to effect the shift from the local property tax to the state.

1. In view of the fact that the 1965 revisions to the sales tax act are estimated to provide additional state revenues in 1967-68 of approximately \$24 million, the committee recommends that the Property Tax Relief Fund grants for 1968 be increased from \$40 to \$52 per pupil in average daily attendance, which will cost approximately \$6.3 million over the present \$18 million appropriation to the Property Tax Relief Fund.

2. The committee recognizes that the state's revenue situation will always be paramount in determining state public school finances, but recommends to the General Assembly the need for granting funds to schools on the basis of equalization and on the basis of quality education in these schools.

3. The committee also feels that without a substantial increase in the amount of money available for the state support program, there can be no major changes in the distribution formula. A change without substantial increases would merely shift the distribution, taking funds away from one district and giving them to another.

4. The committee recommends that the state begin looking for additional revenue so that a greater proportion of the burden of school finance can be shifted from local property taxes to state level non-property taxes, and further recommends that as additional funds become available for distribution to the public schools, serious consideration be given to the adoption of a new distribution

formula embodying the equalization principle, establishing a foundation level which would more nearly reflect actual expenditures, and setting up a district-state partnership which would eliminate the county from the program.

5. The committee recommends that the present Public School Foundation Act be revised in two respects.

a. The small attendance center provision (123-6-15, C.R.S. 1963) should be strengthened by eliminating the statutory authorization for additional aid for small centers located 20 or more miles from a similar center in the same district but less than 20 miles from another similar center in a different district. This involves striking language in section 123-6-15(1) as follows:

(1) In the event that any school district maintaining a full twelve-year program within the district shall necessarily operate one or more isolated elementary or secondary school attendance centers having less than one hundred seventy-five pupils in average daily attendance in either an elementary or a secondary school attendance center because such center is located twenty or more miles from the nearest similar center, ~~or twenty or more miles from a similar center in the same district, if such district was organized either under articles 8 or 25 of chapter 123, C.R.S., 1963,~~ such school district shall be entitled to additional classroom units...

The change would have reduced the allocation for small attendance center aid by an estimated \$631,280 if it had been in effect for 1966-67.

b. The excess growth provision (123-6-14, C.R.S. 1963) should be revised by lowering the percentage required for eligibility from five per cent to three per cent. Section 123-6-14(1) would be changed as follows:

(1) If during the first twelve weeks of a school year, a school district shall experience an increase in average daily attendance in excess of ~~five~~ THREE per cent of its average daily attendance during the first twelve weeks of the preceding school year, such school district may, at the discretion of the state board, be allowed one additional classroom unit for each twenty-five pupils in average daily attendance in excess of such ~~five~~ THREE per cent increase;...

The change would add approximately \$598,000 to the cost of state aid for excess growth under this section.

6. The committee suggests that recommendations be made by the State Board of Education concerning reorganization of both small and large school districts where feasibility reports show the necessity of reorganization.

STATE AID TO SCHOOLS

The study assignment for the Committee on State Aid to Schools directed "a study of the purposes, accomplishments, and goals of the over-all program of state support for public schools in Colorado, including an examination of the level and amount of support under the various programs and the factors used to determine the distribution and use of state funds."

In carrying out this assignment the committee: (1) reviewed the background of state school aid in Colorado and the concepts involved; (2) collected statistics on school finance in the school districts of the state; (3) reviewed some possible indicators of levels of quality in education and the approximate cost at each level; and (4) considered various possible major changes in the state aid formula.

Background Information¹

Early History of State Appropriations for Public Schools in Colorado

For many years the public schools of Colorado were financed almost entirely by local property taxes at the county and district levels. At first the state's contribution was limited to the distribution of the Public School Income Fund (interest, rentals, and leases on state-owned school lands). In 1877 the state's first General Assembly, pursuant to the provisions of the newly adopted constitution (Article IX, Section 3), provided for the semi-annual apportionment of the Public School Income Fund to the counties. The first distribution was made in July, 1879, in the amount of \$7,041.30, which represented a payment of 26.6 cents for each child of school age on the school census.

In 1917 the General Assembly made the first indirect appropriation from the state general fund to the public school districts. This was in "An act to provide for the promotion of vocational education...", providing for the matching of federal funds "with money on a dollar for dollar basis, to be paid out of funds appropriated for the maintenance and support of the institutions under its [the State Board of Agriculture's] control."

1. Much of the background information compiled for the committee was taken from a 1961 Legislative Council publication, "State Aid to Schools in Colorado," Research Publication No. 60.

Apart from these two programs -- one constitutionally imposed and the other indirect in nature -- there was no state aid to public schools until 1935.

Beginnings of Direct State Participation in Public School Finance in Colorado

In 1935, a token appropriation of \$500 was made from the state general fund to the public schools for replacement of property taxes. The appropriation was a test to find out if the state could constitutionally participate in the financing of public schools. The Colorado Supreme Court, in a 1937 decision, upheld the right of the state to appropriate moneys for that purpose. The court stated:

We hold that the establishment and financial maintenance of the public schools of the state is the carrying out of a state, and not a local or municipal purpose. The legislative department had the constitutional power to make the appropriation by the act here in question. Being for a state purpose the imposition of taxes or the appropriation of moneys in the treasury, the proceeds from taxes imposed, is not unconstitutional...²

Following adoption of the 1936 income tax amendment, the General Assembly in 1937 enacted a state income tax to be used for support of public schools as replacement for local property taxes. The first allocation of moneys for public schools totalled approximately \$878,000.

Once the principle of state participation in public school finance had been firmly established, state appropriations for school purposes began to grow. By 1945 approximately \$3,000,000 (including about \$800,000 from the Public School Income Fund) was being distributed to the public schools annually. By 1950 the amount had increased to approximately \$10,000,000 (about \$1,000,000 from the Public School Income Fund).

1950-51 Governor's Committee

In 1950 a Governor's Committee was established to study school finance in Colorado and the role of the state in the school finance program. In its report, the Governor's Committee defined the characteristics of a good school finance plan. In summary, these were:

2. Wilmore v. Annear, 100 Colo. 106, 65 P. 2d 1433.

1. The state is responsible for seeing that a foundation program of educational opportunity is made available to all children and youth, and for seeing that adequate funds are provided to finance the program.

2. The state plan for the financing of public education should be developed as a partnership program with state, county, and local levels of government sharing equitably in the provision of necessary funds. The state government should ultimately participate to the extent of at least 50 per cent of the cost in the state as a whole.

3. The legal basis for financing education should be incorporated so far as possible in one coherent and comprehensive enactment, or in a closely related and consistent series of enactments. Piecemeal specific legislation or patchwork attempts to modify the financial program should be avoided if possible.

4. The state finance plan should assure that sufficient funds will be available to pay for an adequate foundation program, the cost to be estimated on the basis of careful study of educational need. The foundation program should take into consideration all of the essential elements of good schooling, and the financial program should assure a balanced inclusion of all these elements.

5. The plan should assure a foundation program in every efficiently organized district without requiring a tax effort greater in proportion to its actual ability than in any other such district. A uniform levy based on equalized assessment ratios should be required by the state as a local effort to finance education before county funds or state funds may be apportioned.

6. State requirements should be in the form of basic standards rather than in the nature of detailed specifications or restrictions. Every local district should have the right and the power to levy or vote taxes to finance educational opportunities over and above the foundation program.

7. A good system provides for accurate budgeting and budget control. Provisions should be made for harmonizing tax years and school fiscal years and for standard budgeting and reporting procedures.

8. The foundation program should provide for the apportionment of state school funds on the basis of equitable and objective formulas which will encourage the organization of efficient school districts. Special provisions should be made for schools which, by reason of isolation, sparsity of population, sudden changes in school population, acts of God, or other valid cause, would otherwise be treated unfairly by rigid adherence to the formulas.

9. The foundation program should encourage the employment and retention of well-qualified personnel for all aspects of the school program.

10. State school support should be distributed in the form of general grants rather than as grants earmarked for specific phases of the educational program. Pupil transportation should be state financed up to the amount of approved costs.

11. A complete state school finance program should make provision for the financing of capital outlay and debt service by a formula which takes into consideration the fiscal capacity and need of each school district. Administrative provisions of the state plan should be as simple and inexpensive as is consistent with the purposes intended.

12. Since educational ideals and practices may change in time, and since the distribution of taxpaying ability may change, a state school finance plan should be reviewed periodically.

1952 Public School Finance Act

The 1950-51 committee submitted a proposed Educational Foundation Act incorporating all of the committee's recommendations with regard to revision of the statutes on financing the public schools. The Public School Finance Act, passed by the General Assembly in 1952, resulted from the work of this committee. It was a milestone in the development of the foundation principle in Colorado.

The 1952 Public School Finance Act provided for classroom units as follows:

(a) one C.R.U. for the first 2,160 aggregate days of attendance;

(b) a second C.R.U. for the next 2,880 aggregate days of attendance;

(c) and one additional C.R.U. for each additional 3,600 aggregate days of attendance.

Classroom unit values were set at \$2,425 (non-graduate certificates) and \$2,625 (graduate certificates). Participating districts were required to pay salaries to their teachers equal to at least three-fourths of the classroom unit value, and the number of classroom units could not be greater than the number of equivalent full-time teachers employed. The minimum days of school required for a district to receive state funds was set at 170, and no more than the first 180 days could be used in computing classroom units. The computation of classroom units involved a sparsity factor (aggregate days of attendance were increased in districts where there were fewer than 216 aggregate days of attendance per square mile). Districts maintaining necessary isolated schools could apply to the state board for a determination of necessity for the allowance of additional classroom units.

The minimum district levies were set at two mills for a county or union high school district, six mills for districts of the first, second or third class which were parts of county or union high school districts, and eight mills for all other districts.

A county six-mill levy was established for school purposes and distributed proportionally among districts on the basis of need (calculated as the difference between the total value of the district's classroom units and the proceeds of the minimum district levy). Fourteen mills for general and special school levies met the minimum requirements for a county or city and county consisting of one school district only.

The State Public School Fund was established as a continuing fund from which the state's share of the cost of the public school finance program would be paid. Fifty-five per cent of the state appropriation was to be distributed by August 15 on the basis of aggregate days of attendance. The remainder was to be distributed by January 15 on a classroom unit basis. The state undertook to provide the deficiency between the amount produced by the county levy plus the minimum district levy and the amount required to provide for each classroom unit at the values assigned.

A one and one-half per cent contingency reserve fund was established from which the state board could distribute to needy school districts upon consideration of financial emergencies caused by an act of God; sudden increases in enrollment; temporary enrollments; efforts of the district to provide sufficient funds for its own use; and standards of education maintained by the district.

Districts were required to certify to the state board that they had elected to come under the terms of the act, and to report the total aggregate days of attendance, the number of square miles, and the salaries and degrees of teachers employed. The Tax Commission was required to certify to the state board the assessed valuation of each district.

No moneys from the State Public School Fund were to be used for debt service or capital outlay. The fiscal year was left to the determination of the board of education of each district. Also, provision was made for distribution of aid to joint districts.

State moneys for 1952-53 totalled nearly \$15,000,000 including moneys for vocational education and the special educational program which had been started in 1937. Table A shows the growth of state aid programs from that time through 1963-64.

1953 Amendments to Public School Finance Act

In 1953 the Public School Finance Act was amended to lower the minimum county levy to four and one-fourth mills and the minimum district levies to one and one-half mills for county or union high school districts, five and one-half mills for districts

Table A

STATE MONEY DISTRIBUTED UNDER STATE AID PROGRAMS, 1952-1964*

<u>Year</u>	<u>Vocational Education</u>	<u>Special Education</u>	<u>Trainable Mentally Retarded</u>	<u>Migrant Education Programs</u>	<u>N.D.E.A. of the first, second or third class which were parts of county or union high school districts, and seven mills for all other districts. A total levy of eleven and one-fourth mills would meet minimum requirements in a county or city and county consisting of one district only. The classroom unit values were raised to \$2,500 (non-graduate certificates) and \$2,725 (graduate certificates).

1955 Amendments to Public School Finance Act

In 1955 the act was amended to raise the county levy to four and one-half mills (eleven and one-half mills for one-county districts). The distribution of the county public school fund to individual districts was changed to a straight A.D.A. basis (without regard for the proceeds of the minimum district levy). The classroom unit values were raised to \$2,700 and \$3,000.

Also in 1955 an attempt was made to determine an appraisal ratio factor. The State Board of Education was directed to compute the relation between actual assessed valuation and appraised valuation (as determined by the state board of equalization) in each county. This factor was to be applied to the assessed valuation of each county and each school district in order to arrive at an adjusted valuation to be used in calculating the amounts to be produced by the minimum levies. (The State Tax Commission reported in 1955 that the State Board of Equalization found no differences between the appraised valuation and the assessed valuation of any county in the state.)

The dates for distribution of direct Aggregate Daily Attendance grants were changed so that one-half would be distributed on August 1 and one-half on November 1, and the dates for distribution under the classroom unit program were changed to one-half on February 1 and one-half on May 1.

1955-56 Legislative Council Committee

In 1955 a Legislative Council Committee on Education was appointed to consider, among other things, matters of public school finance. This committee and its subcommittees (Public School Finance, School District Reorganization and Recodification, Economic Index, Special Education and Higher Education) conducted comprehensive studies in 1955 and 1956.

As one of its first steps, the Subcommittee on School Finance developed a set of basic principles regarding school finance for guidance in its studies and evaluations:

1. Provide for a state-local partnership in the financing of a realistic foundation program.

2. Encourage the development and exercise of local leadership and responsibility for education.

3. Insure that all taxpayers in the state provide their fair share of the cost of public education.

4. Seek to secure optimum educational returns from all expenditures.

5. Provide that the law should be as simple, equitable, and as administratively sound as possible.

6. Encourage the development of school districts and attendance areas large enough to facilitate the operation of complete, economical, and efficient schools.

The subcommittee devoted considerable time to the study of the existing Public School Finance Act and prepared a detailed analysis of the mechanics and operation of the statutory provisions in effect. Data were compiled on the following subjects:

Variations in local district ability to support public education;

Variations among school districts in per-pupil expenditures;

Pupil-teacher ratios;

Actual classroom unit expenditures;

Relationship between assessed valuation and various other measures of economic ability; and

Long-range costs of public education in Colorado.

Upon the basis of these studies the subcommittee formulated its recommendations. Its findings and recommendations were prefaced by the statement that "most of the difficulty and confusion concerning Colorado's School Finance Act stems from the failure to differentiate between this Act as a means of distributing a fixed amount of revenue and a bona fide foundation program. While the Act has some characteristics of both types of programs, it is fundamentally a distribution plan."

1956 Transportation Act

In 1956 the General Assembly established a state aid program for public school transportation. Under the new program districts were entitled to four cents per mile and two cents per day for each pupil actually transported. If the district provided a board allowance in lieu of transportation, the entitlement was fifteen cents per day.

1957 Public School Foundation Act

The Public School Foundation Act passed by the General Assembly in 1957 incorporated many of the recommendations of the 1955-56 Legislative Council committee. Provisions of the 1957 Foundation Act included:

1. Classroom units were to be calculated on the basis of average daily attendance rather than aggregate daily attendance.
2. The size of classroom units was established as: 15 average daily attendance for the first unit; 20 A.D.A. for the next three units; and 25 A.D.A. for each additional unit, allowing added units where necessary for small or isolated attendance centers.
3. An "excess growth" factor was included whereby districts having an increase of seven per cent or more in average daily attendance during the first twelve weeks of the current school year over the average daily attendance of the first twelve weeks of the previous school year could in the discretion of the State Board of Education be allowed additional classroom units.
4. Classroom unit values were established at \$4,500 (non-graduate) and \$5,200 (graduate).
5. The "sparsity factor" of the previous School Finance Law was eliminated.
6. The district qualifying levy was eliminated and the county levy was raised to 12 mills.
7. The minimum school year was set at 172 days.
8. Minimum teacher salaries were set at 65 per cent of the classroom unit value.
9. The direct grant reserve (receipts from the Public School Income Fund) was to be distributed on the basis of aggregate daily attendance by May 1.
10. Quarterly distribution dates for equalization grants (two preliminary payments and two adjusted payments) were established.

Under the provisions of the 1957 Foundation Act, the amount of state aid to a county was to be determined by first arriving at the cost of the minimum program, i.e., the number of classroom units in the county -- graduate (\$5,200 value) and non-graduate (\$4,500). From this total would be deducted the amount of money to be raised from a 12-mill levy on the unadjusted assessed valuation within the county, with the state to provide the difference between the amount raised from the county levy and the total cost of the minimum program.

Also in 1957 the transportation entitlement was raised to eight cents per mile and four cents per pupil. A limitation was added -- no district could receive more than 75 per cent of the actual transportation cost.

1960 Amendments and Interim Legislative Committees

The provisions of the 1957 act remained largely unchanged until 1960 when a sales ratio factor was added. Sales ratio is the percentage the assessed valuation is of the sales market price of property. The state average sales ratio and the sales ratio of each of the counties was determined by studies conducted by the Legislative Council. Under the 1960 amendment, a 50 per cent sales ratio factor was incorporated into the equalization formula. That is, the county's assessed valuation for purposes of computing the amount to be raised by the 12-mill county levy was adjusted from the county's actual sales ratio halfway toward the state average sales ratio. For higher assessing counties the amount to be raised by the 12-mill levy was figured on an adjusted valuation which was lower than the unadjusted valuation. For lower assessing counties the amount was figured on an adjusted valuation which was higher than the unadjusted valuation. The theory was that higher assessing counties should not be penalized and lower assessing counties should not be rewarded for their assessment practices in terms of the amount of state aid distributed under the Public School Foundation Act.

Despite the passage of this 1960 amendment, there was by no means universal agreement within the General Assembly on the merits of such a change and a special interim legislative committee was appointed to review this question and to prepare recommendations for the 1961 session. The 1960 committee recommended the continuation of the 50 per cent sales ratio adjustment for one more year, followed by the adoption of a new formula when the necessary information became available. The recommended formula would have had the following features:

1. Apply the sales ratio factor at 100 per cent to adjust assessed valuation in calculating the minimum local effort.
2. Establish an additional adjustment factor based on each county's deviation from the state average of personal net taxable income.
3. Return twenty per cent of the state personal income tax revenue to the counties of origin.

The committee also recommended the use of spot appraisals to supplement sales ratios, the inclusion of additional information on sales (realty recording) certificates, and a change to a calendar year sales ratio computation. The committee recommended further that neither the value nor the size of the classroom unit should be revised for 1961-62 and that state appropriations should be sufficient to implement fully the computed cost of the program.

A minority statement was included in the committee report favoring at least a \$200 increase in the graduate classroom unit value and a standard 25 A.D.A. per classroom unit. The minority statement also dissented from the majority recommendation for an income ability adjustment applied to assessed valuations and from the recommended return of 20 per cent of the income tax.

1961 Amendments

After much discussion and controversy, the 1961 General Assembly agreed upon a one-year program whereby state school aid under the Public School Foundation Act would be distributed during 1961-62 using a sales ratio adjustment applied at 100 per cent to urban real property only, with no adjustment being made in the assessed valuation of rural real property. In addition, the General Assembly provided in a "grandfather" clause that no county would receive any less moneys per classroom unit than it had in 1960-61 with due consideration being made for changes in the number of classroom units and in a county's assessed valuation.

However, the funds provided to implement the program for 1961-62 were less than the total needed and, because of the "grandfather" clause included in the 1961 act, instead of each county receiving a uniform per cent of its share of the fund (approximately 94 per cent), allocations varied from about 57 per cent to about 105 per cent. Thus the inclusion of the grandfather clause in the 1961 bill for the most part negated the basic formula adopted, i.e., adjusting the assessed valuation of urban real property by sales ratio. Furthermore, those counties which the act was designed to penalize because of under-assessment of urban real property actually gained state aid as a result of the interpretation of the bill's grandfather clause by the State Department of Education and the Attorney General's Office.

Also in 1961, transportation entitlements were changed to ten cents per mile and three cents per pupil.

1961 Legislative Council Committee

The 1961 bill containing amendments to the Public School Foundation Act also directed the Legislative Council "to conduct a study of methods for distribution of state moneys to the public schools, and to recommend a formula therefor." The committee appointed by the Legislative Council to carry out this assignment reported that it had found several areas where substantial agreement existed for recommending changes in the Public School Foundation Act. However, a formula to determine a county's ability to support a minimum educational program was not one of these areas of agreement. The committee submitted the following recommendations pertaining to the Public School Foundation Act:

"1. The committee agrees that any foundation program which the General Assembly might adopt should be fully implemented. Such action would facilitate budget estimating on the part of local school boards. Most importantly, however, those school districts where state aid represents a larger proportionate share of their total school operating budget are more severely affected when the program is funded at less than 100 per cent, thereby defeating a basic principle of the act itself in providing state assistance where the need is greatest.

"2. The foundation principle of requiring county-wide minimum effort for eligibility to participate in the program should be retained. Equalizing educational opportunity among the districts within a county is equally as important as equalizing educational opportunity among the several counties in Colorado. Otherwise the burden of local financing falls on the local school district, and the 'partnership' aspect of the program is reduced.

"3. The requirement of a contingency fund should be continued but not at an amount equal to one and one-half per cent of the cost of the program. This percentage provision has remained in the law since its enactment when the total appropriation was much smaller than it is now; as a result, a much greater amount of money is being provided for this purpose than is necessary. The committee therefore recommends a separate appropriation for the contingency reserve fund in the amount of \$300,000, with any unexpended balance at the close of the fiscal year to revert to the state's general fund.

"4. Classroom units (C.R.U.'s) should be based on a straight one unit for each 25 students in average daily attendance (A.D.A.) instead of the present provision at the rate of five C.R.U.'s for the first 100 A.D.A. and four C.R.U.'s for each additional 100 A.D.A. At the same time, a separate provision should be written into the law to make allowances for small or isolated attendance centers....

"Under this recommendation for small or isolated attendance centers, standards would be written into the law to provide that a reorganized school district maintaining a full 12-grade program, with an attendance center 20 miles or more from the nearest similar center within the same school district, and which has 150 or less A.D.A. would be entitled to the number of classroom units indicated in the following tabulation:

Classroom Unit Entitlement of Attendance Center

<u>Elementary</u>		<u>Secondary</u>		
<u>A.D.A.</u>	<u>1-6 or 1-8 Unit</u>	<u>A.D.A.</u>	<u>7-12</u>	<u>9-12</u>
Less than 25	1	Less than 25	1	1
25.1 - 50	2	25.1 - 50	4	4
50.1 - 75	3	50.1 - 75	5	5
75.1 - 100	4	75.1 - 100	6	6
100.1 - 125	5	100.1 - 125	7	7
125.1 - 150	6	125.1 - 150	8	8

"5. The classroom unit value should be uniformly set at \$5,200 with no distinction being made between graduate and non-graduate teachers for classroom unit value purposes as at present (\$5,200 and \$4,500). The committee believes that in view of the 1961 teacher certification act it will be merely a matter of time before there will be few non-graduate teachers employed in this state and eventually there will be none except in emergency cases.

"6. The provision in the current Foundation Act allowing additional classroom units for growth in excess of seven per cent over the previous year should be continued. This will allow those areas experiencing sharp increases in their school populations to receive immediate assistance under the Public School Foundation Act instead of placing this financial burden wholly on the local taxpayers by delaying state aid for a year.

"7. State appropriations for junior college aid should be in a separate bill in order to focus attention more completely on the funds to be used for implementing the Public School Foundation Act.

"8. Any formula agreed upon should be adopted on its merits and not on whether any county would 'lose' state aid; consequently, no 'grandfather' clause should be included, i.e., a provision which states that no county would receive less state aid under a new distribution formula than it presently receives.

"9. The ability-to-pay factor should be based on county assessed valuation without adjustment.... In this connection, the committee found no majority support for any of the other factors considered -- adjusted gross income, assessed valuation adjusted by urban sales ratio, or a combination thereof -- but a majority of the members voting did approve a recommendation to use unadjusted assessed valuation as the measure of ability to pay as was used in the 1957 Public School Foundation Act."

Accompanying the committee's report were two minority reports expressing divergent views on the question of the factor to

be used in determining county ability. On the one hand, six of the 15 committee members recommended that "the General Assembly continue the Public School Foundation Act with assessed valuation adjusted by a sales ratio factor as the basic measure of county ability to support a minimum school program." On the other hand, five members of the committee submitted a minority report recommending that "the principle of using adjusted gross income as a measure of a county's ability to support a minimum educational program should be incorporated in the Public School Foundation Act."

1962 Revision of Public School Foundation Act

In 1962 the General Assembly rewrote the Public School Foundation Act, incorporating several of the recommendations of the 1961 Legislative Council committee and adopting a new formula for determining county ability. The new formula included adjusted gross income as well as assessed valuation adjusted by urban sales ratio.

The computation of the minimum equalization program for 1962-63 under the new formula involved the following steps:

1. 1961-62 aggregate days of attendance in county \div 172 = average daily attendance in county.
2. Average daily attendance in county \div 25 = number of classroom units (CRU's) in county.
3. 1962 assessed valuation, adjusted by the three-year average (1959-61) urban sales ratio \div number of CRU's = adjusted assessed valuation per CRU.
4. 1961 adjusted gross income in county \div number of CRU's = adjusted gross income per CRU.
5. Adjusted gross income per CRU + adjusted assessed valuation per CRU = base figure; base figure x .53 per cent factor = county shared support per CRU.
6. County shared support per CRU x number of CRU's = total county shared support.
7. County shared support \div 1962 unadjusted assessed valuation = mill levy for shared support.
8. \$200 county required support x number of CRU's = total county required support.

9. County required support \div 1962 unadjusted assessed valuation = mill levy for required support.
10. Mill levy for shared support + mill levy for required support = total county mill levy.
11. \$5,000 less county shared support per CRU = state support per CRU.
12. State support per CRU x number of CRU's = total state support for county.
13. County shared support per CRU (\$200) + county required support per CRU + state support per CRU = value of classroom unit (\$5,200).
14. Value of classroom unit (\$5,200) x number of CRU's = total value of minimum equalization program for county.

When adjusted gross income was added to the formula for determining the county's contribution to the minimum program, the uniform 12-mill county levy was eliminated. It was replaced with a county levy determined as shown in step 10 above. County levies varied from county to county, and in most counties the levy was lower than 12 mills.

Although the major change effected by the new law was the inclusion of adjusted gross income as an element in the determination of county ability, there were other significant changes.

The direct grant reserve program was discontinued. Moneys from the Public School Income Fund, which had always before been distributed on a per pupil (direct grant) basis, were added to the State Public School Fund and distributed under the provisions of the Foundation Act.

All classroom units were figured on a basis of one unit for each 25 students in average daily attendance. Also, all classroom units were valued at \$5,200, regardless of the graduate or non-graduate status of the teachers. The requirement that teachers' salaries be set at 65 per cent of the classroom unit value was eliminated.

A program was established whereby small attendance centers were granted additional classroom units in accordance with statutory standards.

A special provision was added to grant an additional \$200 per classroom unit in any county in which the adjusted gross income per classroom unit was less than \$103,000.

The requirement that the contingency reserve fund be maintained at one and one-half per cent of the cost of the program was eliminated.

1962 Legislative Council Committee

As part of the act revising the Public School Foundation Act, the Legislative Council was directed to continue its Committee on School Aid for the purpose of reviewing the formula and recommending necessary or desirable refinements or changes therein.

The committee recommended several minor changes in the 1962 act. Most of these were in the nature of "housekeeping" changes which had been suggested by the State Department of Education to clarify the law.

1963 Amendments

Most of the recommended "housekeeping" changes were adopted by the General Assembly in 1963, but these were not the major amendments. More significant among the changes were the following:

1. The classroom unit value was raised from \$5,200 to \$5,400. Because of the operation of the formula the additional \$200 state support per classroom unit was, in effect, distributed on a per pupil (direct grant) basis.
2. The factor in the formula was changed from .53 per cent to .57 per cent.
3. Sales ratio was stricken from the formula.
4. The excess growth necessary to qualify for additional aid was lowered from seven per cent to five per cent.
5. Provision was made for using adjusted gross income and assessed valuation figures which would be known at the time the appropriation was made: adjusted gross income for the second taxable year immediately preceding the state fiscal year for which the appropriation was to be made, and assessed valuation for the calendar year immediately preceding such fiscal year.
6. Small attendance centers of under 25 children were included in the statutory table so that the additional classroom units could be calculated locally. Previously these schools had been covered by the contingency reserve.
7. The low income county program was made applicable to counties in which the adjusted gross income per classroom unit was less than \$100,000 (rather than \$103,000).
8. Transportation entitlements were changed to 15 cents per mile. The three cents per pupil remained the same.

1964 Legislative Council Committee

There were no amendments to the Foundation Act in the 1964 session of the General Assembly. However, the Legislative Council was directed to appoint a committee to study and review the Foundation Act and report to the First Regular Session of the Forty-fifth General Assembly.

The committee discussed some of the assumptions and proposals which were currently being advanced in the area of school finance but did not recommend any particular proposal. The report stated:

The committee feels...that the widespread concern about high property taxes warrants serious exploration of ways of shifting at least part of the burden away from the property tax....There are two basic approaches:

- (1) Reduce the proportion of school costs to be paid by counties and districts (through the property tax) by increasing the proportion to be paid by the state (through statewide non-property taxes); or
- (2) Provide a new source of revenue for paying the counties' and/or districts' share -- that is, a replacement for the property tax at the local level.

...Changes in the minimum equalization program of the Foundation Act would make shifts in the proportionate distribution among counties, as well as increase the state's total contribution to school costs. The General Assembly has spent considerable time and effort over the past five years trying to achieve a satisfactory balance in the distribution. If there is no desire to become involved in entanglements over the equalization distribution this year, it may be better to take a different approach.

...The committee is very much aware of the demand and need for property tax relief.... Knowing the many factors which affect decisions on tax increases and distribution of state school aid, however, the committee does not feel it should endorse any particular proposal or combination of proposals at this time.

Also, the committee wishes to call attention to a very real problem in the whole area of property tax relief. This problem exists whether the relief comes through increased state support or local replacement taxes. ...If new revenues are provided by the General Assembly for the specific purpose of

reducing property taxes, school districts should be mindful of that purpose. We hope that self-imposed restraint on the part of school districts can be counted on to make property tax reduction possible.

1965 -- Establishment of Property Tax Relief Fund

No changes were made in the Foundation Act in 1965, but a new fund, called the Property Tax Relief Fund, was established. Appropriations from this fund were made to the public school districts to enable relief of school district general fund property taxes. Appropriations were made for distribution during the calendar year beginning January 1, 1966, and amounted to \$40 for each pupil in average daily attendance.

Table B shows the state aid appropriated for 1964-65, 1965-66, and 1966-67.

Table B

STATE AID APPROPRIATED FOR 1964-65, 1965-66, AND 1966-67

	<u>1964-65</u>	<u>1965-66</u>	<u>1966-67</u>
<u>Foundation Act (Excl. Jr. Colls.)</u>			
Minimum Equalization Program	\$43,671,925	\$46,073,226	\$44,967,222
Excess Growth	1,752,400	1,100,000	624,000
Small Attendance Centers	1,248,000	1,222,000	1,206,400
Contingency Reserve	500,000	300,000	300,000
<u>Property Tax Relief Fund¹</u>	---	9,046,200	18,142,700
<u>Transportation</u>	2,821,543	3,773,770	4,247,550
<u>Vocational Education</u>	150,000	250,000	365,943
<u>Special Education</u>	1,300,000	1,884,000	2,705,697
<u>Migrant Education</u>	96,203	147,000	171,058
<u>N.D.E.A. -- Title III</u>	<u>160,000</u>	<u>160,000</u>	<u>160,000</u>
TOTAL APPROPRIATION	\$51,700,071	\$63,956,196	\$72,890,570
Cash Funds ²	5,400,000	5,600,000	5,600,000
TOTAL AMOUNT AVAILABLE	\$57,100,071	\$69,556,196	\$78,490,570

1. The appropriations were for calendar year distribution:

1966 -- \$18,092,400

1967 -- \$18,193,000

Only one-half of the first appropriation was available for the 1965-66 school year.

2. Estimated public land and mineral lease receipts.

Committee Summary of Objectives of State Aid Programs

After reviewing the history of state aid in Colorado and the reasoning behind the adoption of the several state aid programs over the past decade the committee prepared a summary of the principal concepts and goals embodied in these enactments. The committee was impressed with the extent to which many of the original objectives have been attained:

1. Equalization of educational opportunity for children throughout the state.
2. Equalization of taxpayer effort in terms of local ability.
3. Encouragement of school district reorganization.
4. Improvement of assessment practices.
5. Raising of teacher qualifications.
6. Establishment of desirable teacher-pupil ratios.
7. Setting the minimum length of the school year.
8. Raising teacher salaries.
9. Relieving the local property tax burden.
10. Providing assistance for transportation costs incurred because of reorganization.
11. Encouragement of at least a minimum of educational opportunity for children of migrant workers.
12. Encouraging the establishment of special education programs for handicapped children.

In commenting on the extent to which these goals have been achieved, the committee made the following observations.

Equalizing educational opportunity. The most commonly talked about measure of equal educational opportunity apparently revolves around the amount of money being expended on behalf of each child. Certainly the original goal of equalizing educational opportunity, in these expenditure terms, has been achieved at a level of \$208 per student in average daily attendance since the 1963-64 figures show the lowest general fund expenditure per ADA is \$240 to a high of \$1260 -- the average being \$471.

Encouraging school district reorganization. Obviously the combination of the Foundation Act plus the School District Reorganization Act have encouraged district reorganization since the number of districts in the state has been reduced from 1,017 in 1955 to 184 in 1965. There are only 14 counties which are not classified as having completed reorganization. Yet the Department of Education reports that the small attendance provision in the Foundation Act is hindering reorganization in some counties, both reorganized and unreorganized.

Improving assessment practices. The General Assembly, after an apparently futile attempt to use the Foundation Act as a lever to improve assessment practices, has chosen to attack this problem in a direct approach through the adoption of H.B. 1005 in the 1964 session.

Raising teacher qualifications. The differential between classroom unit values for degree and non-degree teachers undoubtedly contributed to upgrading the training of teachers to the extent that the differential has been eliminated in the Foundation Act. Also, the Teacher Certification Act of 1961 has eliminated this problem for all practical purposes. Perhaps there are those who would advocate raising teacher qualifications beyond the bachelor degree level by a new differential.

Setting pupil-teacher ratios. The 1955 study indicated that the average pupil-teacher ratio was 20.2 to 1. The highest average county ratio was 23.7 to 1 and the lowest was 11.3 to 1. The median, calculated on the number of districts, was 14.6 to 1. The 1963-64 data show an average of 21.5 ADA per certificated teaching personnel. The lowest county average is now 7.7 in Hinsdale County and the highest is 26.0 in Chaffee County.

Setting the minimum school year. A minimum of a 172-day school year has been achieved. The use of 180 days in calculating Foundation Act payments, as a maximum, has encouraged some school districts to go above the 172 minimum. Should the minimum now be increased to encourage greater use of school facilities?

Raising teacher salaries. In 1954, only three years before the adoption of the Foundation Act, the median teacher salary in the state was \$3542. For 1954-55, the average current expenditure per teacher was \$5651. Requiring 65 per cent of the \$5200 CRU value to go for teacher salaries apparently contributed to salary increases for teachers. The 65 per cent requirement was eliminated a few years ago. The average teacher salary in the state as of the 1963-64 school year was \$6000 for elementary teachers and \$6208 for secondary teachers. If the CRU value were to be increased significantly, is the principle of raising teacher salaries through Foundation Act provisions still valid?

In view of the extent to which the original goals have been achieved, the committee concluded that it is time to begin developing new goals aimed at improving the level of quality of education in the schools as they exist today and as they will exist in the future.

Statistical Information on School District Finances

Preliminary to consideration of specific methods of encouraging improvement of quality, the committee reviewed statewide figures on present school district revenues and expenditures and agreed that similar information for each school district would be helpful. The statewide figures for 1963-64 are shown in Tables C and D. They contain more detail than was possible for each school district, but the district information was nevertheless fairly extensive.

Twenty-one tables showing similar financial information for individual districts for 1962-63, 1963-64, and 1964-65 can be found in the appendix to this report. The 1964-65 figures are the latest available at this time. The tables cover the period from July 1 to June 30 for each year, regardless of the fiscal year of the individual school district. The figures are based on the Secretary's Annual Reports (Form DS-1) which are submitted each year to the State Department of Education.

Tables 1-6 give revenue and property tax information for all funds -- the bond redemption, building, and capital reserve funds as well as the general fund. Tables 7-12 cover revenues and property taxes for the general fund only. Tables 13-18 give detailed expenditure information for the general fund. Tables 19 and 20 show general fund expenditure information according to size of district and Table 21 shows transportation expenditures per ADA and per pupil transported.

School District Revenues, All Funds

Tables 1, 2, and 3 show revenues per student in average daily attendance for all funds for 1962-63, 1963-64, and 1964-65 respectively. General fund revenues are compared with revenues for the other three funds (bond redemption, building, and capital reserve) and property tax revenues for all funds are shown as a per cent of total revenues.

Tables 4, 5, and 6 accompany the first three tables and show the revenues for the general fund, bond redemption fund, building fund, and capital reserve fund in total dollar amounts. Non-revenue receipts and beginning balances have been excluded.

General Fund Revenues Compared With Other Revenues. The state average general fund revenues per ADA compared with other revenues per ADA for the period 1962-63 through 1964-65 are as follows:

	<u>Gen. Fund Revenue Per ADA</u>	<u>Revenue Per ADA For Bond Red., Bldg., Cap. Res. Funds</u>	<u>Total Revenue Per ADA</u>
1962-63	\$461.20	\$70.64	\$531.84
1963-64	472.44	73.99	546.43
1964-65	508.98	84.05	593.03
Per Cent Increase			
'62-63 to '63-64	2.44%	4.74%	2.74%
Per Cent Increase			
'63-64 to '64-65	7.73%	13.59%	8.53%

The 1964-65 general fund revenues per ADA ranged from a low of \$152.27 to a high of \$1,638.11. In 1963-64 the low was \$247.11 and the high was \$1,587.44. The distribution is shown below:

General Fund Revenues Per ADA, 1963-64 and 1964-65

<u>Amount Per ADA</u>	<u>No. of Districts</u>	
	<u>1963-64</u>	<u>1964-65</u>
\$1,000 or over	9	15
900 - 999	6	5

General Fund Revenues

Tables 7, 8, and 9 show the amount and per cent of revenue reported by school districts as coming from local, county, state, and federal sources. The footnotes to these tables should be studied carefully because they point out a number of limitations inherent in the reporting of the data.

In addition to the footnotes, two items should be noted. First, Denver and Jefferson County combine county revenues with local revenues for reporting purposes. This makes the state total for local revenues correspondingly higher and the state total for county revenues correspondingly lower. Second, the federal school lunch, school milk and surplus food programs are types of federal revenues which are not reported on the Secretary's Annual Report and therefore do not appear in the tables under either the federal revenue column or the total revenue column.

Tables 10, 11, and 12 show total general fund revenues per ADA and general fund property tax revenues as a per cent of total general fund revenues.

Sources of General Fund Revenues (Local, County, State, Federal). Statewide averages show that school district revenues were reported as coming from local, county, state, and federal

sources in the following proportions (percentages may not total 100.0 due to rounding):

	<u>Local Sources</u>	<u>County Sources</u>	<u>Sub- Total</u>	<u>State Sources</u>	<u>Federal Sources</u>	<u>Sub- Total</u>	<u>Grand Total</u>
1962-63	54.7%	14.9%	69.6%	25.6%	4.7%	30.3%	99.9%
1963-64	54.6	14.5	69.1	26.7	4.1	30.8	99.9
1964-65	56.7	13.6	70.3	25.4	4.3	29.7	100.0

General Fund Property Tax Revenues Compared With Total General Fund Revenues. The state average general fund property tax revenues per ADA, compared with total general fund revenues per ADA, are as follows:

	<u>General Fund Property Tax Revenues Per ADA</u>	<u>Total General Fund Revenues Per ADA</u>	<u>% General Fund Property Tax Revenues Are of Total G. F. Rev.</u>
1962-63	\$297.60	\$461.20	64.53%
1963-64	299.03	472.44	63.29
1964-65	330.28	508.98	64.89
Per Cent Increase '62-63 to '63-64	.48%	2.43%	--
Per Cent Increase '63-64 to '64-65	10.45	7.73	--

The 1964-65 general fund property tax revenues per ADA ranged from \$66.74 to \$1,241.63. In 1963-64 the range was from \$59.00 to \$1,287.58. The distribution is given below:

General Fund Property Tax Revenues
Per ADA, 1963-64 and 1964-65

<u>Amount Per ADA</u>	<u>No. of Districts</u>	
	<u>1963-64</u>	<u>1964-65</u>

39 or under	12	10
	<u>204</u>	<u>184</u>

General Fund Expenditures

Tables 13, 14, and 15 show the amount and per cent of general fund expenditures per ADA for: (1) instruction, (2) administration, (3) transportation, and (4) all other general fund purposes. ("All other general fund purposes" includes expenditures for operation and maintenance of plant and equipment, fixed charges, attendance services, food services, health services, student activities, community services, capital outlay, and debt service.)

Tables 16, 17, and 18 give the total dollar amounts expended from the general fund by each district for each of the following purposes: (1) instruction, (2) administration, (3) transportation, (4) operation, maintenance, and fixed charges, (5) attendance services, (6) health services, (7) food services, (8) student activities, (9) community services, and (10) capital outlay and debt service.

Average General Fund Expenditures Per ADA. Statewide averages show the following expenditures per ADA for instruction, administration, transportation, and other:

	<u>Instruc- tion</u>	<u>Admin.</u>	<u>Transp.</u>	<u>All Other Gen. Fund Purposes</u>	<u>Total Gen. Fund Expend.</u>
1962-63	\$312.18	\$15.17	\$15.77	\$108.58	\$451.71
1963-64	328.57	15.40	15.50	111.41	470.88
1964-65	352.40	16.21	15.40	115.76	499.77
Per Cent Increase '62-63 to '63-64	5.25%	1.51%	-1.72%	2.60%	4.24%
Per Cent Increase '63-64 to '64-65	7.25	5.25	- .65	3.90	6.13

Expenditures For Instruction Per ADA. Expenditures for instruction per ADA for the period 1964-65 ranged from \$86.41 to \$893.52, with an average of \$352.40. For 1963-64 the range was from \$146.46 to \$787.06 with an average of \$328.57. The distribution is as follows:

Expenditures for Instruction Per ADA,
1963-64 and 1964-65

<u>Amount Per ADA</u>	<u>No. of Districts</u>	
	<u>1963-64</u>	<u>1964-65</u>
\$475 or over	21	32
425 - 474	21	13
375 - 429	26	33
325 - 374	52	55
275 - 324	53	33
225 - 274	20	10
224 or under	11	8
	<u>204</u>	<u>184</u>

Expenditures for instruction as a per cent of total general fund expenditures averaged 69.8 per cent in 1963-64 and 70.5 per cent in 1964-65, with a range from 44.5 per cent to 76.1 per cent in 1963-64 and from 29.1 per cent to 76.1 per cent in 1964-65. The distribution is:

Expenditures For Instruction Per ADA as a
Per Cent of Total General Fund
Expenditures, 1963-64 and 1964-65

<u>Per Cent</u>	<u>No. of Districts</u>	
	<u>1963-64</u>	<u>1964-65</u>

300 - 399	25	16
299 and under	4	5
	<u>204</u>	<u>184</u>

General Fund Expenditures Per ADA By Size of District

Tables 19 and 20 show, for 1963-64 and 1964-65, total general fund expenditures per ADA grouped according to the ADA of the districts. The districts have been divided into nine groups:

<u>Average Daily Attendance</u>	<u>No. of Districts</u>	
	<u>1963-64</u>	<u>1964-65</u>
20,000 or over	4	4
10,000 - 19,999	5	5
5,000 - 9,999	7	8
2,500 - 4,999	12	13
1,000 - 2,499	31	26
500 - 999	29	30
250 - 499	36	35
100 - 249	53	47
99 or under	<u>27</u>	<u>13</u>
	204	184

The districts within each of these groups have been arranged in order of amount of general fund expenditure per ADA.

Both general fund expenditures and current expenditures are shown. The general fund expenditure figures (column 3) include all expenditures from the general fund reported in the Secretary's Annual Report (Form DS-1). This includes expenditures for instruction, administration, transportation, operation, maintenance, fixed charges, attendance services, health services, food services, student activities, community services, capital outlay, and debt service. Current expenses per ADA (column 4) as gathered by the State Department of Education include all general fund expenditures except capital outlay, debt service, and community services. Current expense also includes fixed charges from all other funds.

Expenditures for transportation per ADA have been subtracted from general fund expenditures (column 6). In most instances expenditures for transportation per ADA are small, but in other cases expenditures for transportation make up a significant part of the general fund expenditure. (Table 15 indicates that 55 or one-third of Colorado's 184 districts spend 10 per cent or more of their general fund moneys on transportation.)

Transportation Expenditures, 1963-64

Table 21 compares general fund transportation expenditures per ADA with transportation expenditures per pupil transported. In addition the total ADA and the total number of students transported as well as the total general fund expenditures for transportation are shown. It should be noted that the ADA figures shown are actual ADA figures.

Transportation Expenditures Per ADA. Total expenditures for transportation per ADA in 1963-64 ranged from \$.0 to \$362.51, with an average expenditure of \$15.50, and a distribution as follows:

Expenditures for Transportation Per ADA, 1963-64

<u>Amount Per ADA</u>	<u>No. of Districts</u>
\$150 and over	12
135 - 149	3
120 - 134	4
105 - 119	7
90 - 104	12
75 - 89	11
60 - 74	20
45 - 59	22
30 - 44	43
15 - 29	35
.01 - 14	32
No expenditures	3
	<u>204</u>

Transportation Expenditures Per Pupil Transported. The 1963-64 general fund expenditures for transportation per pupil transported ranged from a low of \$10.14 to a high of \$434.42 with an average of \$52.44. The distribution is shown below:

Transportation Expenditures Per Pupil Transported, 1963-64

<u>Amount</u>	<u>No. of Districts</u>
\$210 or more	14
180 - 209	9
150 - 179	13
120 - 149	18
90 - 119	37
60 - 89	48
30 - 59	48
29 and under	13
	<u>200</u>

Size of Districts Spending \$150 or More Per Pupil Transport-
ed. As might be expected, the districts with small ADA in general
have the largest expenditures per pupil transported. The districts
have been divided into four groups:

Size of Districts Spending \$150 or More Per
Pupil Transported, 1963-64

<u>ADA</u>	<u>Total No. of Dists. in Size Grouping</u>	<u>Total No. of Districts Spending \$150 or More Per Pupil Transported</u>
500 and over	88	3
250 - 499	36	9
100 - 249	53	14
99 or under	27	10
	<u>204</u>	<u>36</u>

Three Levels of School Operation

Having obtained all of this detailed school district financial information, the committee sought some way of relating the financial pattern of a school district to the quality of education in that district. As a step in this direction the State Department of Education was asked to develop a description of what makes a high quality education program. State Department officials pointed out that there is no agreement on what makes quality education and any description of quality levels is bound to involve subjective judgments. They agreed, however, to prepare a preliminary description for the use of the committee. This preliminary document described three levels of public school systems in Colorado:

	<u>LEVEL I</u> <u>Poor</u>	<u>LEVEL II</u> <u>Acceptable</u>	<u>LEVEL III</u> <u>Superior</u>
Board Action and Policies (including Philosophy)	Generally no written policies, rules and regulations. Board and even individual members take administrative action. No policies on instruction.	Written policies and statement of philosophy. Generally not well understood and little participation by staff in formulation. Board's role: policies, rules and regulations.	Well-formulated and understood policies, rules and regulations, and statement of aims and objectives. Staff participates in their development.
Evaluation	Use of teacher-made and some standardized tests. No over-all or systematic evaluation.	Variety of tests used. Some case studies and studies of public opinion. Occasional self-evaluation studies, and studies of former students.	Same - plus systematic and continuing evaluation of education programs in the light of stated aims and objectives. Continuing and comprehensive studies of drop-outs and graduates.
Administration and Supervision	Supt.--A.B. degree with some graduate work. Frequently no Supt. or Supt. with little time or responsibility for administration. No supervision of instruction.	Full-time superintendent with M.A. to M.A. plus 1 yr. Fairly adequate time by Supt., Ass't. Supt., and principal for supervision of instruction. Few special supervisors.	M.A. plus 1 yr.--to doctorate. Sufficient time for administrative and supervisory staff to continuously improve instruction.
Teacher Qualifications and Assignments	Most have A.B. degree. Elementary teachers have little specialization. High school teachers assigned in one or more fields outside of endorsement.	A.B. with 10% to 20% M.A. Supervisory staff limited. Elementary teachers have majors in el. education; high school teachers have major part of assignment in fields of endorsement.	50% to 100% teachers have M.A. Teachers assigned in fields of endorsement.
Special Services - Personnel	Partly trained librarian. Part-time nurse from public health office.	Several well-trained special service workers such as: librarian, counselor (high school) psychologist. Special services in minimum supply. Also special elementary supervisors in music, art, and physical education.	Provided as needed: those named plus elementary school guidance and school social workers.
Facilities: School Plant and Basic Equipment	Insufficient space for essential programs and activities. Inappropriate especially for new programs. Inflexible.	Ample space for rather broad program and varied activities. Some flexibility. Healthful environment.	Same - except greater flexibility with a total physical environment that educates and inspires.
Size and Organization	P-T Ratio -- 30 - 35. Enrollment generally less than 250 (1-12). Self-contained elementary classrooms. Two or more grades under	P-T Ratio -- 25 - 30. Even in elementary, pupils have contact with several teachers. Enrollment 250 - 500. Sufficient size to pro-	P-T Ratio -- 20 - 25. Class size very flexible. Much team teaching and independent study. Enrollment 500 or more.

LEVEL I
Poor

LEVEL II
Acceptable

LEVEL III
Superior

one teacher. 8 - 4 organization. Less than 180 days. School day minimum length. Entrance age - 6 yrs. of age by Nov. or Dec.

vide comprehensive, quality program at reasonable cost. K-6-3-3 or K-6-6. 180 days of school. Entrance age - 5 yrs. by Oct. 15.

Sufficiently large to provide efficiently a very broad and high quality program. K-6-3-3 with addition of some pre-school or nursery school. 180 days or more. K. entrance by examination for those below 5 yrs. by Sept. 15.

Education Program

Elementary:

Traditional subjects except that science, music, art and phys. ed. are weak or lacking. Generally poor sequence and continuity. Co-curricular activities lacking. Little attention to the individualization of instruction.

Rather broad offering of subjects with studied integration and continuity. Individualization attempted in many ways such as by grouping, team teaching, use of programed materials, careful selection of educational experiences. Serious attempt made to balance programs and to enrich experiences. Several co-curricular activities introduced, especially some student participation in school government.

Same - plus much greater individualization of instruction. Continuous progress programs designed to more closely fit individual needs. Wider variety of enrichment experiences.

Junior High:

Traditional offerings of upper grades in elementary schools. No exploratory experiences. Little work in shop activities of phys. ed. or crafts. Co-curricular activities limited or lacking.

Program of studies designed for transition period between elem. and senior high. Considerable opportunity for exploration. Wider variety of activities provided. Balance in all aspects of the program. Intra-mural given more importance than inter-scholastic activity.

Same - plus higher level of attainment, better integration and continuity. More individualization. Wider offering of exploratory and enrichment experiences. Student activities available to meet all needs.

Senior High:

In 9-12 organization 25 or less units of work offered. In 10-12 organization 20 or less units. Academic program with additional work in bus. ed., and woodworking. Limited co-curricular program in scholastics, athletics and possibly band.

10-12 organization offering 25 to 50 units. Many courses, pre-vocational and vocational work plus wide variety of other courses to meet special needs. All major areas included, plus basic and possibly advanced work in art and music. Good balance in total program. Rather comprehensive student activity program designed to meet needs of pupils. Perhaps 50% participation.

Same - with an even broader offering with 50 or more units of work. Program enhanced with greater individual attention and provision of more equipment to stimulate individual interest, and to encourage individual achievement. Activities program encouraged and 50% to 100% participation.

Summer school for select groups to serve specific purposes.

Summer education opportunity in all areas to meet variety of needs. Special attention to enrichment experience.

Special Programs:

Programs provided for the physically and mentally handicapped.

Same - plus programs for educationally handicapped.

	LEVEL I <u>Poor</u>	LEVEL II <u>Acceptable</u>	LEVEL III <u>Superior</u>
Instruction Materials and Equipment	Textbooks primarily. Some supplementary printed materials. Projection and record- ing equipment very limited.	Limited offerings in the field of adult education. Many supplementary materials available in classroom plus rich resources in library and A-V centers. Projection and recording equipment generally available. Curriculum and instruc- tional guides developed by district.	Comprehensive offer- ings on the adult educational level. Same - plus wider variety and better availability.
Library and Instructional Materials Center	No elementary library. High school library in inadequate space with very limited resources.	Beginnings of elementary libraries. H.S. librar- ies reasonably well- stocked. Fairly ample space. Audio-visual equipment and materials in fair supply with good service to teachers.	Well-stocked in- structional materi- als center includes all library and A-V materials and service. Under highly competent leadership. Space adequate for all purposes including independent study, and very flexible.
Experimentation and Research	Traditional textbook approach. Little use of supplementary materials. Little individualization. Practically no experi- mentation and no re- search.	Receptive attitude to- ward change. Wide use of a variety of instruc- tional materials. Con- siderable experimenta- tion and some research.	Same - plus extensive experimentation and research in such areas as team teach- ing, ETV, ungraded programs, use of pro- gramed materials, and flexible scheduling.
In-Service Education	Little or none.	Specific budget provi- sion. Professional study rewarded by partial payment of tuition and salary increments. Some released time pro- vided for in-service education and some travel expenses paid to meet- ings.	Adequate financial provision made for in-service education of entire staff. Special emphasis on released time for participation in wide variety of improve- ment activities.

Cost Per ADA At Three Levels of Quality

The next step following the description of the three levels of public school systems in Colorado was to find the approximate cost of each level. The committee asked the State Department of Education to estimate the per pupil cost of operating a superior program, an acceptable program, and a poor program.

To do this the Department undertook to identify ten sample school districts operating at each level. The names of the districts were not disclosed. Ten districts were identified at the poor level and ten at the acceptable but only eight could be classified as operating at the superior level.

Average per pupil cost figures were compiled for each level, based on actual 1964-65 expenditures in the sample districts. Expenditures for transportation were not included.

The 1964-65 per pupil operating expenditures (minus transportation) for the districts in the sample were:

Districts with Superior Programs	\$484.64
Districts with Acceptable Programs	441.28
Districts with Poor Programs	713.74

The equivalent amounts per classroom unit (estimated by multiplying the per ADA costs times 25 without any attempt to take into account the 8-day variation in the actual number of days school was held) were:

Districts with Superior Programs	\$12,116
Districts with Acceptable Programs	11,032
Districts with Poor Programs	17,843

Table E shows the breakdown of these expenditures for each level, along with expenditures for debt service. Table E also shows the number of pupils involved in the sample districts at each level. The districts classified as having poor programs were in most cases very small and consequently had high per pupil costs.

The poor quality districts in the sample received a higher level of state and county support from the Public School Foundation Act in 1964-65 than the acceptable and superior districts. The state and county support from the Foundation Act (including the small attendance centers, excess growth, and low income provisions as well as the basic \$5400 from the minimum equalization program)

Table E
Colorado Public School Systems
Cost Per ADA
At Three Levels of Quality 1964-65

<u>Expenditures, Not Including Transpor- tation Costs</u>	<u>Poor 10 Districts (1,028.5 ADA)</u>	<u>Acceptable 10 Districts (83,809.5 ADA)</u>	<u>Superior 8 Districts (82,370.1 ADA)</u>
Administration	\$ 59.93	\$ 11.82	\$ 15.60
Instructional Salaries	475.82	317.14	351.25
Textbooks	7.72	5.29	3.03
Library and Audio-Visual	3.61	3.19	4.74
Teaching Supplies	13.62	7.36	5.97
Other Instructional Expense	5.13	3.22	3.11
Attendance Services	0	1.20	.42
Health Services	.38	2.59	1.30
Operation of Plant and Equipment	74.38	39.03	50.37
Maintenance of Plant and Equipment	24.39	13.32	16.71
Fixed Charges	<u>48.76</u>	<u>37.12</u>	<u>32.14</u>
Total Excluding Debt Service	\$ 713.74	\$ 441.28	\$ 484.64
* * * * *			
Debt Service:			
Bond and Interest	<u>73.33</u>	<u>54.43</u>	<u>82.57</u>
Total Including Debt Service	\$ 787.07	\$ 495.71	\$ 567.20
Approximate Amount per CRU (times 25 ADA)			
Excluding Debt Service	\$17,843.50	\$11,032.00	\$12,116.00
Including Debt Service	19,676.75	12,392.75	14,180.00

averaged \$7,354 per classroom unit for the ten poor districts in the sample. The distribution was as follows:

Districts With Poor Programs

<u>No. of Districts</u>	<u>Program Support Per CRU</u>
4	\$ 5,400 Low
1	6,296
3	8,200 - 8,690
1	10,600
<u>1</u>	<u>13,200</u> High
10	\$ 7,354 Average

The state and county Foundation Act support for the ten acceptable districts in the sample averaged \$5,466 for 1964-65. This is about 25 per cent below the average for the ten poor districts. The distribution for the acceptable districts is given below. The highest Foundation Act support to a district in the acceptable group was \$7,091 per classroom unit compared with a high of \$13,200 in the poor group.

Districts With Acceptable Programs

<u>No. of Districts</u>	<u>Program Support Per CRU</u>
3	\$ 5,400 Low
5	5,410 - 5,522
<u>2</u>	<u>7,057</u> - 7,091 High
10	\$ 5,466 Average

For the districts with superior programs the average Foundation Act support was \$5,480, only slightly above that for the acceptable group. The highest support to a district in the superior group was \$7,057.

Proposed Changes in State Aid Programs

Following the discussion of costs of acceptable and superior programs the committee moved to a consideration of possible changes in programs for state assistance to local schools. The State Department of Education was asked to develop and submit an ideal proposal for a state aid program which would help bring all districts up to the acceptable level and would encourage districts to achieve the superior level of education.

The Department was hesitant to present any formula as an "ideal" proposal. Hence the committee received a "progress report" rather than a final report or recommendation from the Department. The progress report suggested several major changes involving both the level of state support and the distribution formula.

Program III

The initial presentation by the State Department of Education involved a formula known as Program III. (See Table 22 in the Appendix.) Under Program III the state would reimburse each school district for a proportion of its previous year's operating expenses up to the median expenditure. The proportion to be reimbursed to an individual district would be determined by the property taxpaying ability of the district as measured by its assessed valuation per pupil. For the state as a whole the reimbursement would amount to over half of the districts' operating expenses (after transportation costs, federal aid, and specific state aids are deducted).

Program III would differ from the present state aid program in several respects. Major differences include the following:

- (1) The level of state support would be considerably higher than at present.
- (2) The county would not be included, either as a contributor or as the unit for which ability is measured.
- (3) Adjusted gross income would not be used in determining ability to pay property taxes at the local level.
- (4) The minimum local levy required to participate in the equalization program would be the same for every district (15 mills).
- (5) State aid would be in the nature of reimbursement for the previous year's expenditures rather than a grant aimed at supplementing current general fund resources.

- (6) All state aid would be distributed through the equalization program. There would be no over-all direct grant and no special programs for small attendance centers, districts with excess growth, or low income counties.
- (7) State aid to a district would vary not only according to ability but also according to how much the district spent per pupil during the preceding year.
- (8) Revenues from federal sources and from specific state aid programs would be deducted before computing state equalization aid.
- (9) Districts with fewer than 50 students in high school would be excluded from the equalization program.
- (10) Average daily attendance would be figured by dividing the aggregate days by 180 rather than 172.

Two basic figures are vital to the proposed formula. The first is the state's median adjusted current expense per pupil and the second is the assessed valuation base figure which determines how much the state will help a district.

Median adjusted current expense per pupil. Adjusted current expense is current expense (all general fund expenditures except community services, capital outlay, and debt service) minus transportation costs. Program III uses the median adjusted current expense per pupil of all the districts in the state: \$508.27 for 1964-65.

Under Program III this median is the maximum amount per pupil for which a district can receive reimbursement the following year. It provides a flexible but somewhat unpredictable base, since the median will change from year to year.

Assessed valuation base figure. Since assessed valuation is the sole measure of property taxpaying ability under the formula, an assessed valuation base figure must be established. Any district having a per pupil assessed valuation at this level or higher would be able, if it wished, to provide the median adjusted current expense per pupil without exceeding a specified millage. Any district having a lower per pupil assessed valuation would not be able to offer the same program at the same millage without state support. Such a district would be entitled to state aid sufficient to provide the median adjusted current expense per pupil if the district were levying the specified millage and spending the median amount.

For Program III, the Department of Education used an assessed valuation base figure of \$23,392 per pupil. This was determined by

finding the 1964-65 median per pupil assessed valuation of all the districts in the state (\$11,696) and multiplying by two. Using a median figure which changes from year to year involves the same flexibility and unpredictability found in the use of the median adjusted current expense. However, since the \$23,392 was arrived at by arbitrarily doubling the median, the median itself cannot be considered essential to the determination of the assessed valuation base figure.

In Program III as applied to the 1964-65 figures, any district could provide, either alone or together with state aid if its valuation were below the base figure, an adjusted current expense per pupil of \$508.27 by levying approximately 21.7 mills on its valuation. Thus the state would be equalizing to a valuation per pupil of \$23,392.

In effect, the state under the proposal promises to equalize by making up the difference between the district's actual assessed valuation per pupil and the state-wide base figure. That difference, shown as a per cent of the base figure, constitutes the state support ratio. The state support ratio is the proportion of adjusted current expense (less federal aid and specific state aid) for which the state will reimburse the district.

Steps in figuring support to district. The steps in Program III are as follows:

1. Find the "weighted" average daily attendance for the district by dividing the aggregate days of attendance by 180 days with kindergarten counted as one-half day. (If the high school WADA is less than 50, the district is out of the equalization program and receives only \$10 per WADA.)

2. Divide the district's assessed valuation by the weighted average daily attendance to find the AV/WADA.

3. Subtract the district's AV/WADA from the state assessed valuation base figure (\$23,392 in Program III).

4. Divide the difference obtained in step 3 above by the base figure (\$23,392) to determine the state support ratio for the district. (If the AV/WADA exceeds the base figure the state support ratio is zero and the district is out of the equalization program and receives only \$10 per WADA.)

5. Find the district's total adjusted current expense by subtracting transportation expense from current expense.

6. Divide the total adjusted current expense by the weighted average daily attendance to find the ACE/WADA, and if the ACE/WADA exceeds the median adjusted current expense (\$508.27 in Program III), multiply the median by the WADA to determine the total ACE eligible for reimbursement. (No district is entitled to reimbursement for expenditures above the median per pupil adjusted current expense.)

7. To find the district expense subject to equalization support, subtract the following from the district's total adjusted current expense as shown in step 5 or 6 above:

Revenue from state sources:

- Vocational education
- Special education
- Public Law 86-864 (NDEA)
- Migrant education
- Other revenue from state sources

Revenue from federal sources

- Mineral leases
- Federal forest lands
- Federal lands materials
- Federal lands marginal
- Flood control
- Johnson-O'Malley Act
- Public Law 874, except Sec. 4(a) amount
- Other revenue from federal sources

8. Multiply the district expense subject to equalization support, step 7 above, times the state support ratio, step 4 above, to determine the state equalization support for the district.

Table 22 in the Appendix shows the basic computations for each school district.

Concepts Involved in Program III. During its first year of deliberations the committee considered a list of questions on state aid policies. The list contained a number of specific issues that invariably arise when the subject of state school aid is discussed. At that time there was no agreement on the answers to these questions.

Later, when the State Department of Education presented a concrete proposal, the committee looked at the Department's answers to these same questions as evidenced by the proposed formula. By reviewing the Department's position in this manner the members were better able to gain a perspective for the evaluation of the concepts in Program III.

The questions, with the answers given by the State Department of Education through Program III, are given below:

1. Is the "guaranteed minimum amount" concept (guaranteeing, through a combination of state support and required local effort, a specified amount per pupil or per classroom unit throughout the state) still an acceptable concept in Colorado?

The Department's proposal as initially presented to the committee answers this question "no." It does not guarantee a specified amount per pupil in every district in the state. It merely provides for partial reimbursement (according to ability ratios) of whatever amount the district might choose to spend for adjusted current expense (up to a maximum reimbursable level of \$508.27 per pupil less specific state and federal revenues).

However, the Department indicated that it probably would include in the proposal an additional element which would retain the concept of a guaranteed foundation and thus answer the question "yes" -- a required minimum district levy of 15 mills for adjusted current expense. This would be part of the district's general fund levy. (Under the proposal there would be no county public school levy.)

The 15-mill levy, based on the proposed state equalization level of \$23,392 assessed valuation per pupil, would provide a guaranteed minimum foundation of approximately \$350.88 per pupil (\$8,772 per classroom unit of 25) in every district within the equalization program. That is, after the district had levied the 15 mills on its valuation, the state would make up the difference between the per pupil proceeds of that levy and \$350.88 (the amount 15 mills would have produced had the district's valuation per pupil been \$23,392).

The 15-mill requirement would not apply until the second year of operation of the formula, since the first year would be based on actual expenditures during the preceding year -- a year in which the district had no such requirement. Consequently, unless the state agreed to support the minimum of \$350.88 per pupil even though the district had not levied its 15 mills for adjusted current expense, the first year of operation would not include a guaranteed minimum foundation. (Nine school districts operated during 1964-65 at a cost below \$350.88.)

It should be understood that the proposed formula provides an area of incentive over and above the minimum foundation of \$350.88. A district would be reimbursed at its state support ratio for any amount actually spent for adjusted current expense up to \$508.27 per pupil, less specific state and federal revenues. This incentive area is an additional element which has never before been present in Colorado's state aid formulas.

2. Has Colorado's foundation program achieved equalization of educational opportunity?

The Department's proposal indicates that the present level of equalization is inadequate. In effect, our foundation program and our \$40 per pupil direct grant provide equalization of educational opportunity at a level of \$256 per pupil (\$6400 per classroom unit of 25). The proposal provides that equalization of

educational opportunity would be at a level no lower than \$350.88 per pupil and would be aimed at a desired level of \$508.27 (\$12,707 per classroom unit).

The proposal offers a method for encouraging equalization of educational opportunity at the median per pupil expenditure for adjusted current expense. The Department contends that this would be a more realistic approach which would provide greater equalization of educational opportunity and could be kept up to date from year to year.

3. What level should be designated by the state as the foundation level?

The proposal would raise the foundation level from \$256 per pupil (\$6400 per classroom unit of 25) to \$350.88 (\$8,772 per classroom unit). Incentive support would be provided to a maximum reimbursable adjusted current expense of \$508.27 (\$12,707 per classroom unit), adjusted annually as the median expenditure rises.

4. To what extent should the state provide general support apart from the equalization program?

Under the proposal, the bulk of the state aid for general purposes would be included within the equalization program. There would be no separate direct grant for all students, such as we have at the present time under the Property Tax Relief Fund.

Some districts would be excluded from the equalization program, however (due to fewer than 50 pupils in high school or assessed valuation of more than \$23,392 per pupil), and these districts would be given a direct grant of \$10 per pupil (\$250 per classroom unit of 25).

Support for special purposes would be continued outside the equalization program -- transportation, vocational education, migrant education, special education, etc.

5. What proportion (or what dollar amount) of the equalization program should the state provide (statewide)?

The proposal would provide state support of \$108 million toward reimbursement of the \$207 million 1964-65 adjusted current expense of the districts. This amounts to approximately 52 per cent.

6. Should the local contribution to the equalization program be provided at the county level or the district level?

The local contribution would be from the individual districts. The proposal involves a state - district partnership. County boundaries would be ignored.

7. What proportion of the state share of the equalization program should be distributed on a direct grant basis?

Direct grants would make up a very small proportion of total state aid for general purposes under the proposal. Only those districts excluded from the equalization program would receive direct grants (\$10 per pupil).

8. What proportion of the state share should be distributed according to an equalization formula which determines the relative local contribution by using measures of local ability?

Nearly all of the state aid for general purposes would be distributed according to the equalization formula measuring local ability. The districts excluded from the equalization program (because of fewer than 50 pupils in high school or assessed valuation of over \$23,392 per pupil) account for only a small proportion of the state's pupils and would involve a very small amount of state money. Special purpose programs (transportation, vocational education, migrant education, special education, etc.) would remain as at present.

9. How should local ability be measured and how should the local contribution be raised?

The Department's proposal measures local ability solely on the basis of assessed valuation per pupil. It eliminates adjusted gross income as a measure of ability.

The local contribution would be raised by district property taxes under the proposal.

10. To what extent should the state give aid to pay transportation costs?

The Department has proposed no change in the transportation support program.

11. To what extent should the state give aid to pay costs attributable to necessary small or large size conditions?

According to the Department's proposal, there would be no separate program to cover small or large size conditions. Amounts spent due to such conditions would be reimbursed the following year.

12. To what extent should the state give aid to pay costs attributable to the unusually rapid growth of the districts?

The Department's proposal provides no separate program to cover excess growth, since amounts spent due to such growth would be reimbursed the following year.

13. To what extent should the state give additional aid to counties (or districts) falling below a certain level of adjusted gross income?

The Department's proposal eliminates additional aid for low income counties.

14. How liberal should the state contingency fund provisions be?

The contingency fund provisions were not discussed in connection with the proposed formula.

15. Should all state aid programs be integrated into the foundation program?

The proposal would replace the present minimum equalization, excess growth, small attendance center, low income, and Property Tax Relief Fund programs. It would not, however, integrate the special purpose programs into the total package; transportation, vocational education, special education, migrant education, etc., would remain separate.

Comparison of Program III with Present Program. The total adjusted current expense of all the school districts in the state for 1964-65 was about \$207 million. If Program III had been in effect for 1965-66, the state would have provided reimbursement in the amount of \$108 million, or approximately 52 per cent. Under the present program for 1965-66 the state provided about \$60 million, or 29 per cent of the 1964-65 adjusted current expense. The complete figures are shown below.

Comparison of Program III
With Present Program

ADJUSTED CURRENT EXPENSE, 1964-65 \$207,530,153

REVENUES, 1965-66

	<u>Present Program</u>	<u>Program III</u>
<u>State Support</u>		
Amount	\$ 60,599,530*	\$ 108,328,986
Per Cent	29.20%	52.20%
<u>Other Specific Rvs.</u>		
Amount	12,422,351	12,422,351
Per Cent	5.99%	5.99%
<u>Local Property Taxes</u>		
Amount	134,508,272**	86,778,816
Per Cent	64.81%	41.81%

* Only one-half of the first year's Property Tax Relief Fund was available during the 1965-66 school year.

** Includes both the county public school levy and the district's general fund levy.

Program IV

After reviewing Program III in detail the committee, feeling that the proposed level of state support might be out of reach, asked for information on the same type of distribution formula applied at a lower level. This modified proposal, known as Program IV, would have required \$94 million rather than \$108 million in state support if it had been in effect for 1965-66. (See Table 23 in the Appendix.)

Program IV is the same as Program III in every respect except that the median adjusted current expense per pupil and the assessed valuation base figure are lower. In Program IV the median A.C.E. is the median of the pupils rather than the median of the districts. For 1964-65 the Program IV median A.C.E. was \$471.68 (rather than the \$508.27 used in Program III). The assessed valuation base figure for Program IV was set at \$20,000 (rather than the \$23,392 used in Program III).

In Program IV as applied to the 1964-65 figures, any district could provide, either alone or together with state aid if its valuation were below the base figure, an adjusted current expense per pupil of \$471.68 by levying approximately 23.6 mills. In this program the state would be equalizing to a valuation per pupil of \$20,000.

The steps in Program IV would be the same as in Program III but with \$471.68 substituted for \$508.27 and \$20,000 substituted for \$23,392. Table 23 shows the basic computations for each school districts.

If Program IV had been in effect for 1965-66, the state would have provided about \$94 million toward reimbursement of the \$207 million 1964-65 adjusted current expense. This is about 45 per cent, compared with 52 per cent under Program III and 29 per cent under the present program.

Program V

The committee then asked to see figures on the State Department of Education proposal with state support lowered to \$85 million for 1965-66. To mold the proposal to this level of support, Program V was devised using an adjusted current expense per pupil of \$410 and an assessed valuation base figure of \$20,000. Otherwise Program V was the same as Programs III and IV.

Complete figures on Program V are not available but the amount of state support for each district is shown in Column (6) of Table 24.

Increased Classroom Unit Value Under Present Formula

The committee did not overlook the possibility of increasing the amount of state aid available under the present formula. For purposes of comparison the committee asked to see what the distribution would be if, instead of adopting a new formula, the amount of the proposed increase were added to the present formula. Table 24 in the Appendix shows this comparison for the \$108 million of Program III, the \$94 million of Program IV, and the \$85 million of Program V.

In the absence of a change in the formula, any increase in the amount available is in effect distributed on a per pupil basis. This is true whether the increase is added to the minimum equalization program or the Property Tax Relief Fund. In Table 24 the hypothetical increase was added to the minimum equalization program by increasing the value of the classroom unit.

If \$108 million had been available for distribution under the present formula in 1965-66, the classroom unit value could have

been increased to \$8682, compared with the effective CRU value under the present program of \$5900 (\$5400 under the minimum equalization program and \$500 under the Property Tax Relief Fund). If \$94 million had been available in 1965-66, the CRU value could have been \$7890. If \$85 million had been available, the CRU value would have been \$7378.

Increased Direct Grant and Revisions of Present Formula

The committee asked the State Department of Education for a program involving a still lower amount of state support but the Department, feeling that the validity of Program III and its principles would be lost if state support were less than \$85 million, did not attempt to modify that program further. Instead, the Department offered figures on (a) an increase in the direct grant under the Property Tax Relief Fund, with no changes in the minimum equalization program; and (b) an increase in the value of the classroom unit coupled with a change in the ability formula and discontinuation of the separate direct grant. The figures on these two possibilities are shown in Table 25, using an estimated state support level of \$78 million for 1966-67 (compared with \$68 million under the present program).

Increased Direct Grant. At the \$78 million level the Property Tax Relief Fund grant for 1966-67 could have been \$62 per ADA rather than the present \$40. An additional \$10 million, distributed on a direct grant basis, amounts to approximately \$22 per pupil.

The distribution of state support among the districts under this proposal is shown in Column (3) of Table 25. The total includes both the equalization program and the Property Tax Relief Fund.

Changes in Equalization Formula. Column (4) of Table 25 shows the distribution under a revised minimum equalization formula for a \$78 million 1966-67 state support level. This proposed revision involves several changes. First, the classroom unit value would be raised to \$7575. The maximum amount any county would have to pay would be \$6200 per CRU, the remaining \$1375 becoming in effect a direct grant. Second, there would be no separate Property Tax Relief Fund, since all state aid would be a part of the Foundation Act. Third, the measure of a county's property taxpaying ability (ability to contribute toward the \$6200) would be changed from an equal weighting of assessed valuation and adjusted gross income to an 80-20 ratio (80 per cent assessed valuation and 20 per cent adjusted gross income). The factor applied to the base AV-AGI figure would be increased from .0057 (now applied to the sum of 100 per cent AV and 100 per cent AGI) to .0140 (to be applied to the sum of 80 per cent AV and 20 per cent AGI), with the effective increase being from .0057 to .0070.

A similar formula was considered for a 1965-66 state support level of \$85 million but individual district figures are not available on this proposal. It would have involved a classroom unit value of \$7930 rather than \$7575. Otherwise the formula was the same as the one described above.

Program XXV

One further proposal was considered by the committee. It was presented by one of the members of the committee and was labeled Program XXV. (See Table 26 in the Appendix.) It incorporated some of the features of Program III but was in many ways unlike any of the proposals presented by the State Department of Education.

Under Program XXV each school district would be entitled to state support per pupil in the amount of 60 per cent of the difference between the per pupil proceeds of a 20-mill levy on the districts' assessed valuation and the per pupil base figure of \$475.

Every district would be required to levy 20 mills on its assessed valuation in order to participate in the equalization program. There would be no over-all direct grant, but districts would be guaranteed a minimum of \$10 per pupil in state support.

As in Program III, the county would be eliminated from the formula. The district would be in partnership directly with the state and ability would be measured by the assessed valuation of the district. Also as in Program III, adjusted gross income would be eliminated as a factor in determining local ability. Program XXV would eliminate all aid for small attendance centers and excess growth.

The steps for figuring a district's state support under Program XXV are shown below. Column references are to Table 26 in the Appendix.

1. Find the "weighted" average daily attendance for the district by dividing the aggregate days of attendance by 180 days with kindergarten counted as one-half day. (Column 1.)
2. Divide the district's assessed valuation by the weighted average daily attendance to find the AV/WADA. (Column 2.)
3. Multiply the district's AV/WADA times 20 mills. Every district would be required to levy 20 mills to participate in the equalization program. (Column 4.)
4. Subtract the product obtained in step 3 above from \$475, the amount per WADA on which the state equalization is based. (If the product exceeds \$475, the district would receive the minimum state support of \$10 per WADA.)
5. Take 60 per cent of the difference obtained in step 4 above to determine the district's state support per WADA. If 60 per cent of the difference is less than \$10, the district would receive the minimum state support of \$10 per WADA. (Column 5.)
6. Multiply the state support per WADA times the WADA to determine the total amount of state support for the district. (Column 10.)

If Program XXV had been in effect for 1965-66, the state support would have amounted to \$73.9 million.

Summary

The committee has found it difficult to talk about the comparative merits of the various methods of distributing state aid to schools without getting into the question of the level of state support. The state's present revenue level continues to preclude the adoption of a high level foundation program without looking at the over-all cost to the state.

The committee and the General Assembly must decide how much money the state is willing to put into the state aid program. When that has been determined, the choice of distribution formulas can be made.

The committee has considered only a few of the possible alternatives for distribution at each level of support. They are:

<u>Years for Which Figures Available</u>	<u>Approx. Amount of State Support</u>	<u>Proposed Distribution Formulas</u>
1965-66	\$108 million	Program III Increased CRU Value
1965-66	94 million	Program IV Increased CRU Value
1965-66	85 million	Program V Increased CRU Value Revised MEP
1966-67	78 million	Increased PTRF Revised MEP
1965-66	74 million	Program XXV

Other alternatives for distribution might be developed for any of these levels.

Foundation Act Provisions For
Small Attendance Centers

The committee has been concerned about finding ways to designate and help all the necessary small attendance centers in the state without encouraging or supporting any that are unnecessary.

Present Section 15

The present Foundation Act, in section 15, provides additional classroom units for small isolated elementary or secondary school attendance centers having less than 175 average daily attendance and meeting either of the following statutory requirements:

...located twenty or more miles from the nearest similar center

OR

twenty or more miles from a similar center in the same district, if such district was organized either under the School District Reorganization Act of 1949 or the School District Organization Act of 1957...

The additional classroom units are based on the ADA of the small attendance centers and can be granted in fractional units. The maximum additional units are set out in the following statutory table. Additional units will not be granted in excess of the number of teachers. Each additional unit is fully state-supported at the \$5200 level.

Statutory Table for Additional CRU's
for Small Attendance Centers
123-6-15, C.R.S. 1963

<u>Average Daily Attendance</u>	<u>Elementary</u>	<u>Secondary</u>	
	<u>First to sixth grade or first to eighth grade units</u>	<u>Seventh to twelfth grades</u>	<u>Ninth to twelfth grades</u>
25.0 or less	1½	1½	1½
25.1 to 50	2	4	4
50.1 to 75	3	5	5
75.1 to 100	4	6	6
100.1 to 125	5	7	7
125.1 to 150	6	7	7
150.1 to 175	--	7	7

Under this law (123-6-15, C.R.S. 1963) the number of additional units and the amounts distributed to individual districts for 1965-66 were as shown in Table F.

Present Section 17 (1) (d)

Section 15 does not cover every situation in which a small attendance center requires additional assistance. The contingency reserve can be used to meet needs resulting from other small-size conditions under section 123-6-17 (1) (d).

Grants from the contingency reserve are made in the discretion of the State Board of Education upon application from the district. The law provides that the Board may grant supplemental assistance to school districts determined to be in need thereof as the result of any of a number of circumstances, including:

(d) Unusual circumstances resulting from small-size conditions not otherwise provided for in this article. Small-size shall be that maximum number of pupils in attendance as set out in 123-6-15 (1).

The practice of the Board has been to determine whether or not a district is entitled to assistance from the contingency reserve under the above provision, and if the district qualifies, the assistance is granted in accordance with the schedule set out in section 15.

Table G shows the grants to individual districts under the small-size section of the contingency reserve for 1965-66.

Possible Amendment

In response to a report from the State Department of Education regarding the small centers which derive their eligibility from the second alternative (20 or more miles from the nearest similar center in the same district), the committee considered the possibility of striking the second alternative from the law. The committee examined maps showing the locations of the centers that would be affected and concluded that removal of the second alternative would do much to further the committee's stated purpose of aiding the necessary small attendance centers and withholding additional aid from those that are unnecessary.

Table H shows what the 1965-66 distribution would have been if the second alternative had been eliminated. The total cost to the state would have been only \$509,600, less than half the amount of the actual 1965-66 entitlement under the present law.

If this amendment is adopted, any necessary small center eliminated by virtue of the amendment could apply to the State Board for assistance under section 17 (1) (d), the contingency reserve. The Board would review each application on its merits.

Foundation Act Provisions for
Excess Growth

In addition to reviewing the small attendance center provisions of the Foundation Act, the committee considered the possibility of lowering the percentage requirement for eligibility under the excess growth provision.

Present Section 14

The present Foundation Act, in section 14, provides for additional classroom units to districts experiencing a high growth rate. Additional units are granted to each school district in which the average daily attendance during the first 12 weeks of the school year has increased in excess of five per cent of the first 12 weeks of the preceding year. One additional unit is allowed for each ADA in excess of the five per cent increase. Additional units will not be granted in excess of the number of teachers. Each additional unit is fully state-supported at the \$5200 level.

The 1965-66 distribution of excess growth units under section 123-6-14, C.R.S. 1963, is shown in Table I.

Possible Amendment

The committee considered the possibility of lowering the growth percentage required for eligibility under section 14. The State Department of Education prepared estimates on the effect of each percentage level, even though by its very nature, excess growth cannot be predicted accurately. The approximate number of units at each level is shown in the following table. Information on individual districts is too unreliable to include.

EXCESS GROWTH RELATIONSHIPS AT VARIOUS GROWTH LEVELS

<u>Excess of:</u>	<u>No. of Districts</u>	<u>No. of CRU</u>	<u>Amount @ \$5,200/CRU</u>
5%	20	120	\$ 624,000
4%	22	174	904,800
3%	25	235	1,222,000
2%	28	321	1,669,200
1%	30	381	1,981,200

The committee is interested in lowering the requirement to three per cent. This would add over 100 units to the program and would nearly double the cost to the state.

Other Matters Considered by the Committee

Methods of Counting Pupils

The committee discussed the different methods of counting pupils for purposes of the Foundation Act.

Under the present law (123-6-3), average daily attendance is computed by dividing the aggregate days of attendance by 172. In figuring the aggregate days of attendance, the district may count up to the first 180 days of school. Attendance in kindergarten classes is counted as one-half day rather than a full day.

Other possibilities include the use of average daily membership or enrollment in lieu of average daily attendance; counting kindergarten as a full day rather than a half day in computing aggregate days of attendance; and dividing the AgDA by 180 days, or by the actual number of days school was held, rather than by 172 days.

The State Department of Education discouraged the use of straight enrollment because it is not a stable figure. Either average daily membership or average daily attendance can be used, however. The choice between ADA and ADM must be based on policy considerations.

On the subject of kindergarten, the State Department urged a change in the law so that kindergarten can be counted as a full day. The reasons were twofold: (1) counting kindergarten as a full day for purposes of the Foundation Act and the Property Tax Relief Fund will encourage more districts to establish kindergarten; and (2) bookkeeping at the state level would be simplified if kindergarten were counted as a full day, because this would enable state records to be kept on the same basis as federal records which already count kindergarten as a full day.

Regarding the number of days to be used in computing average daily attendance, the State Department supported the principle of using the actual number of days school was held, since the mandatory divisor of 172 is no longer necessary as an incentive for lengthening the school year to 172 - 180 days. All districts have at least 172 days and all but 17 districts are now at 180 or above. However, it may be desirable to continue using a common divisor, set at 180 rather than 172, to provide incentive for the 17 districts now below 180. In Programs III, IV, and V the AgDA (counted up to 180 days) was divided by 180 to compute the "weighted" daily attendance.

Figures for selected districts indicate that the change which would have the greatest effect on the distribution and amount of aid would be counting kindergarten as a full day. This would

add about 16,000 to the state's ADA. The other possibilities mentioned above would have a relatively small effect on the amount of state aid and the general pattern of distribution among districts.

Summer School

The summer school programs in Colorado school districts were of interest to the committee in its over-all review of programs. The State Department of Education provided the following facts about summer programs in 1965:

(1) Forty-seven school districts in 28 counties conducted summer programs. Enrollment totaled 20,517, about five per cent of the regular year enrollment of the 47 districts. The state's 19 largest districts were included in the 47.

(2) The length of the summer terms varied from 20 to 40 days, with the majority lasting about 30 days.

(3) Of the summer school enrollments, 45 per cent were senior high school students, 21 per cent were junior high students, and 34 per cent were elementary pupils.

(4) Comparison by type of class shows that 70 per cent of the students were enrolled in remedial courses, 20 per cent in supplemental courses, and 10 per cent in advanced courses.

(5) The 47 school districts spent a total amount of slightly over \$600,000 to operate the summer schools. Of this amount, 55.7 per cent was provided by school district tax dollars and 43.9 per cent was from student tuition and fees. These percentages vary considerably from district to district. No state aid is provided for summer programs.

(6) Only seven of the 47 districts provided pupil transportation during the summer session.

The committee asked for an estimate of the cost of providing state aid for summer programs. If state aid had been available for the 1965 summer session on the same basis as aid is given for the regular school year, the 47 districts would have received about \$380,000 in state aid. It should be pointed out, however, that if state aid had been available, the number of districts holding summer sessions might have been larger.

Reorganization

The committee considered the question of strengthening the organization act to require reorganization in certain situations. The committee recognized the pressing need for reorganization in some areas of the state and the relationship between refusal to reorganize and inability to meet accreditation standards. The committee suggested that recommendations be made by the State Board of Education concerning reorganization of both small and large school districts where feasibility reports show the necessity of reorganization.

In Programs III, IV, and V the State Department of Education addressed the same problems in a different manner. Small districts with fewer than 50 students in high school were excluded from the equalization formula and limited to \$10 per pupil in state aid. For 1965-66 this provision would have affected about 40 districts.

Accreditation

In its quest for measures of quality in education, the committee looked at the accreditation systems of the North Central Association and the State Department of Education. Some consideration was given to establishing several levels of state accreditation rather than evaluating on the basis of one level only. Although the committee discussed the possibility of denying state aid to non-accredited districts, the State Department of Education discouraged this policy because of the undesirable experiences of other states which have attempted it.

Property Tax Relief Fund

In December of 1965 the State Department of Education reported to the committee on the school district levies for 1966, in anticipation of the \$40 per pupil distribution during calendar 1966 under the Property Tax Relief Fund.

According to the report, 72 school districts reduced their general fund levy; 31 districts retained the same general fund levy; and 81 districts increased their levy. The 103 districts that either "held the line" or reduced the general fund levy represented 77.5 per cent of the pupils in the state and 77.4 per cent of the assessed valuation.

The report stated that in addition to mill levy reductions the Property Tax Relief Fund enabled many school districts to make improvements in educational programs. These included improvement of educational programs through additions to curriculum, reduced teacher load, and improved salaries.

Similar information on mill levies and educational improvements resulting from the Property Tax Relief Fund will probably be provided for the General Assembly in December of 1966.

Elementary and Secondary Education Act of 1965

The federal Elementary and Secondary Education Act of 1965, which brings Colorado an additional \$10 million in federal aid annually, was explained to the committee at its first meeting.

Title I of the act is directed toward youngsters from poor families and is intended to implement new programs to help these youngsters. Colorado's allotment for Title I is about \$8½ million. The number of eligible children in a district is determined by the income of the family, and the district receives one-half the state's average per pupil cost for each eligible child. Children attending non-public as well as public schools are included.

Title II provides moneys for instructional materials and library resources. Colorado's allotment for Title II is something over \$1 million. Title II books and materials are not limited to youngsters from poor families but extend to all students in both public and non-public schools.

Title III offers funds for supplementary educational centers and services. Local schools apply directly to the federal government for approval of projects under this title. Colorado schools could receive a total of about \$1 million annually, if projects are approved to that amount.

Title IV is an extension of the cooperative research program which has been going on for several years. It is a nationwide and regional rather than a state program.

Title V is designed to strengthen and improve state departments of education so that they can provide effective leadership for the improvement of education in the future. Title V provides about \$280,000 annually for Colorado. No matching funds are required for the first two years of the act, but for the last three years the state must match on a fifty-fifty basis in order to receive the funds.

The \$10 million brought into Colorado under this act each year is bound to have an effect on the schools of the state. The State Department of Education should report annually to the General Assembly regarding the effects this act is having on school programs and school finance in Colorado.

Current Statistics on State Aid

Tables 27 and 28 in the Appendix show state support for schools, by district, for 1964-65 and 1965-66 respectively. Included in the 1964-65 figures (Table 27) are the Foundation Act support and transportation support. Added to these in the 1965-66 figures (Table 28) is one-half of the first appropriation from the Property Tax Relief Fund. Neither table includes state aid from special purpose programs such as vocational education, special education, migrant education, or N.D.E.A.

Table 29 gives similar information estimated for the 1966-67 school year. This table includes one-half of the first PTRF appropriation and one-half of the second.

Table 30 shows the details of the minimum equalization program for 1966-67, by county.

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
2. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (all programs), and federal aid (all programs except those for building purposes). Non-revenue receipts and beginning balances are excluded.
3. Bond redemption fund and capital reserve fund revenues include property taxes, delinquent taxes, and specific ownership taxes. Building fund revenues include P.L. 815 moneys and other miscellaneous non-tax revenues for building purposes. Non-revenue receipts and beginning balances are excluded.
4. Property tax revenues include current property taxes for the general fund, bond redemption fund, and capital reserve fund. Delinquent taxes and specific ownership taxes are excluded.

* ADA for these districts is not reported in the same place as revenue receipts and property taxes, due to mid-year reorganizations.

- A. For the following districts the total ADA for 1962-63 is reported in the new district but part of the revenue receipts and property taxes for 1962-63 are reported in the dissolved districts. Consequently, the revenues and property taxes per ADA reported for these new districts for 1962-63 are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Arapahoe</u> #16, 23, 75, and Sheridan U.H.S.	2 (Sheridan)
<u>Conejos</u> #8 #18, 32	6J (Sanford) 13 (Capulin)
<u>Weld</u> #15, 24 #37, 90, 103 #34, 40, 46, 67, 131	6 (Greeley) Re-2 (Eaton) Re-9 (Ault - Highland)

Footnotes
(Continued)

- B. For the following districts the total ADA for 1962-63 is reported in the dissolved districts but part of the revenue receipts and property taxes for 1962-63 are reported in the new district. Consequently the revenues and property taxes per ADA reported for these dissolved districts for 1962-63 are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Montezuma</u> #5, 29	Re-4A

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (all programs), and federal aid (all programs except those for building purposes). Non-revenue receipts and beginning balances are excluded.
 3. Bond redemption fund and capital reserve fund revenues include property taxes, delinquent taxes, and specific ownership taxes. Building fund revenues include P.L. 815 moneys and other miscellaneous non-tax revenues for building purposes. Non-revenue receipts and beginning balances are excluded.
 4. Property tax revenues include current property taxes for the general fund, bond redemption fund, and capital reserve fund. Delinquent taxes and specific ownership taxes are excluded.
- * ADA for these districts is not reported in the same place as revenue receipts and property taxes, due to mid-year reorganizations.

Table 2
(Continued)

Footnotes continued.

For the following districts the total ADA for 1963-64 is reported in the new district but part of the revenue receipts and property taxes for 1963-64 are reported in the dissolved districts. Consequently the revenues and property taxes per ADA reported for these new districts for 1963-64 are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Weld</u>	
#107, 105	Re-10 (Briggsdale)
#14, 63, 110	Re-11 (Pawnee)
#51	Re-12 (Grover)

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
2. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (all programs), and federal aid (all programs except those for building purposes). Non-revenue receipts and beginning balances are excluded.
3. Bond redemption fund and capital reserve fund revenues include property taxes, delinquent taxes, and specific ownership taxes. Building fund revenues P.L. 815 moneys and other miscellaneous non-tax revenues for building purposes. Non-revenue receipts and beginning balances are excluded.
4. Property tax revenues include current property taxes for the general fund, bond redemption fund, and capital reserve fund. Delinquent taxes and specific ownership taxes are excluded.
- * ADA for districts in these counties is not reported in the same place as revenue receipts, due to mid-year reorganizations.

For the following districts the total ADA for 1964-65 is reported in the now existing districts -- to the right-- but part of the revenue receipts and property taxes for 1964-65 are reported in the dissolved districts. Consequently the revenues and property taxes per ADA reported for these existing districts for 1964-65 are slightly low:

FOOTNOTES ON FOLLOWING PAGE

Table 4
(continued)

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (Foundation Act, special education, transportation, vocational education, NDEA), and federal aid (mineral leases, P.L. 874, vocational education, NDEA, and other federal funds not for building purposes). Non-revenue receipts and beginning balances are excluded.
 2. Bond redemption fund revenues include property taxes, delinquent taxes, and specific ownership taxes.
 3. Building fund revenues include P.L. 815 moneys and other miscellaneous non-tax revenues for building purposes.
 4. Capital reserve fund revenues include property taxes, delinquent taxes, and specific ownership taxes.
- * ADA for these districts is not reported in the same place as revenue receipts, due to mid-year reorganizations.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

- General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (Foundation Act, special education, transportation, vocational education, NDEA), and federal aid (mineral leases, P.L. 874, vocational education, NDEA, and other federal funds not for building purposes). Non-revenue receipts and beginning balances are excluded.
 - Bond redemption fund revenues include property taxes, delinquent taxes, and specific ownership taxes.
 - Building fund revenues include P.L. 815 moneys and other miscellaneous non-tax revenues for building purposes.
 - Capital reserve fund revenues include property taxes, delinquent taxes, and specific ownership taxes.
- * ADA for these districts is not reported in the same place as revenue receipts, due to mid-year reorganizations.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (Foundation Act, special education, transportation, vocational education, NDEA), and federal aid (mineral leases, P.L. 874, vocational education, NDEA, and other federal funds not for building purposes). Non-revenue receipts and beginning balances are excluded.
 2. Bond redemption fund revenues include property taxes, delinquent taxes, and specific ownership taxes.
 3. Building fund revenues include P.L. 815 moneys and other miscellaneous non-tax revenues for building purposes.
 4. Capital reserve fund revenues include property taxes, delinquent taxes, and specific ownership taxes.
- * ADA for districts in these counties is not reported in the same place as revenue receipts, due to mid-year reorganizations.

See Footnotes on Following Page.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. General Fund Revenue from Local Sources as reported on the Secretary's Annual Report (Form DS-1) includes the following items:

- Local property tax
- Delinquent taxes and penalties
- Specific ownership (local)
- Tuition from patrons
- Transportation fees from patrons
- Other revenue from local sources

(See footnote 2 below concerning specific ownership taxes.)

2. General Fund Revenue from County Sources as reported on the Secretary's Annual Report includes:

- County public school fund
- Specific ownership (county)
- Other revenue from county sources

It should be noted that some districts report the entire amount of specific ownership tax receipts under Revenue from Local Sources; others report the entire amount under Revenue from County Sources; and still others divide it between local and county sources.

3. General Fund Revenue from State Sources as reported on the Secretary's Annual Report includes:

- Vocational education
- State public school fund:
 - Minimum Equalization Program
 - Other Support under Foundation Program
- Special education
- Transportation
- Public Law 85-864 (NDEA)
- Other revenue from state sources

Note that the entire amount of aid for vocational education and NDEA is reported as Revenue from State Sources. Individual districts receiving amounts from the state for these purposes do not distinguish between that portion which is federal aid (simply channeled through the state) and that portion which is state aid.

4. General Fund Revenue from Federal Sources as reported on the Secretary's Annual Report includes:

- Mineral leases
- Federal forest lands
- Federal lands materials
- Federal lands marginal
- Flood control
- Johnson-O'Malley Act--Indian education
- Veterans education
- Public Law 874
- Other revenue from federal sources

(See footnote 3 above concerning vocational education and NDEA.)

5. Non-revenue receipts and beginning balances have been excluded.

* ADA for these districts is not reported in the same place as revenue receipts, due to mid-year reorganizations.

See Footnotes on Following Page.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. General Fund Revenue from Local Sources as reported on the Secretary's Annual Report (Form DS-1) includes the following items:

- Local property tax
- Delinquent taxes and penalties
- Specific ownership (local)
- Tuition from patrons
- Transportation fees from patrons
- Other revenue from local sources

(See footnote 2 below concerning specific ownership taxes.)

2. General Fund Revenue from County Sources as reported on the Secretary's Annual Report includes:

- County public school fund
- Specific ownership (county)
- Other revenue from county sources

It should be noted that some districts report the entire amount of specific ownership tax receipts under Revenue from Local Sources; others report the entire amount under Revenue from County Sources; and still others divide it between local and county sources.

3. General Fund Revenue from State Sources as reported on the Secretary's Annual Report includes:

- Vocational education
- State public school fund:
 - Minimum Equalization Program
 - Other Support under Foundation Program
- Special education
- Transportation
- Public Law 85-864 (NDEA)
- Other revenue from state sources

Note that the entire amount of aid for vocational education and NDEA is reported as Revenue from State Sources. Individual districts receiving amounts from the state for these purposes do not distinguish between that portion which is federal aid (simply channeled through the state) and that portion which is state aid.

4. General Fund Revenue from Federal Sources as reported on the Secretary's Annual Report includes:

- Mineral leases
- Federal forest lands
- Federal lands materials
- Federal lands marginal
- Flood control
- Johnson-O'Malley Act--Indian education
- Veterans education
- Public Law 874
- Other revenue from federal sources

(See footnote 3 above concerning vocational education and NDEA.)

5. Non-revenue receipts and beginning balances have been excluded.

* ADA for these districts is not reported in the same place as revenue receipts, due to mid-year reorganizations.

See Footnotes on Following Page.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING;

1. General Fund Revenue from Local Sources as reported on the Secretary's Annual Report (Form DS-1) includes the following items:

- Local property tax
- Delinquent taxes and penalties
- Specific ownership (local)
- Tuition from patrons
- Transportation fees from patrons
- Other revenue from local sources

(See footnote 2 below concerning specific ownership taxes.)

2. General Fund Revenue from County Sources as reported on the Secretary's Annual Report includes:

- County public school fund
- Specific ownership (county)
- Other revenue from county sources

It should be noted that some districts report the entire amount of specific ownership tax receipts under Revenue from Local Sources; others report the entire amount under Revenue from County Sources; and still others divide it between local and county sources.

3. General Fund Revenue from State Sources as reported on the Secretary's Annual Report includes:

- Vocational education
- State public school fund:
 - Minimum Equalization Program
 - Other Support under Foundation Program
- Special education
- Transportation
- Public Law 85-864 (NDEA)
- Other revenue from state sources

Note that the entire amount of aid for vocational education and NDEA is reported as Revenue from State Sources. Individual districts receiving amounts from the state for these purposes do not distinguish between that portion which is federal aid (simply channeled through the state) and that portion which is state aid.

4. General Fund Revenue from Federal Sources as reported on the Secretary's Annual Report includes:

- Mineral leases
- Federal forest lands
- Federal lands materials
- Federal lands marginal
- Flood control
- Johnson-O'Malley Act--Indian education
- Veterans education
- Public Law 874
- Other revenue from federal sources

(See footnote 3 above concerning vocational education and NDEA.)

5. Non-revenue receipts and beginning balances have been excluded.

6. Denver and Jefferson Counties report the combined local and county revenue as "Revenue from Local Sources." Consequently the totals for columns 2 and 3 are proportionately higher and for columns 4 and 5 are proportionately lower.

* ADA for districts in these counties is not reported in the same place as revenue receipts, due to mid-year reorganizations.

See Footnotes on following page.

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (all programs), and federal aid (all programs except those for building purposes). Non-revenue receipts and beginning balances are excluded.
 3. General fund property tax revenues include revenues reported as "local property tax" and as "county public school fund." Delinquent taxes and specific ownership taxes are excluded.
- * ADA for these districts is not reported in the same place as general fund revenue receipts and property taxes, due to mid-year reorganizations.
- A. For the following districts the total ADA for 1962-63 is reported in the new district but part of the general revenue receipts and property taxes 1962-63 are reported in the dissolved districts. Consequently the general fund revenues and property taxes per ADA reported for these new districts for 1962-63 are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Arapahoe</u> #16, 23, 75, and Sheridan U.H.S.	2 (Sheridan)
<u>Conejos</u> #8 #18, 32	6J (Sanford) 13 (Capulin)
<u>Weld</u> #15, 24 #37, 90, 103 #34, 40, 46, 67, 131	6 (Greeley) Re-2 (Eaton) Re-9 (Ault - Highland)

- B. For the following districts the total ADA for 1962-63 is reported in the dissolved districts but part of the general fund revenue receipts and property taxes for 1962-63 are reported in the new district. Consequently the general fund revenues and property taxes per ADA reported for these dissolved districts for 1962-63 are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Montezuma</u> #5, 29	Re-4A

Yuma				
RJ-1 West Yuma	1,087.8	\$ 572.87	\$ 380.66	66.45
RJ-2 East Yuma	926.0	669.95	445.64	66.52
	<u>2,013.8</u>			
Grand Total	431,699.8	\$ 472.44	\$ 299.03	63.29

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (all programs), and federal aid (all programs except those for building purposes). Non-revenue receipts and beginning balances are excluded.
 3. General fund property tax revenues include revenues reported as "local property tax" and as "county public school fund." Delinquent taxes and specific ownership taxes are excluded.
- * ADA for these districts is not reported in the same place as general fund revenue receipts and property taxes, due to mid-year reorganizations.

For the following districts the total ADA for 1963-64 is reported in the new district but part of the general fund revenue receipts and property taxes for 1963-64 are reported in the dissolved districts. Consequently the general fund revenues and property taxes per ADA reported for these new districts for 1963-64 are slightly low:

Dissolved

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. General fund revenues include district and county property taxes, delinquent taxes, specific ownership taxes, tuition, transportation fees, state aid (all programs), and federal aid (all programs except those for building purposes). Non-revenue receipts and beginning balances are excluded.
 3. General fund property tax revenues include revenues reported as "local property tax" and as "county public school fund." Delinquent taxes and specific ownership taxes are excluded.
- * ADA for these districts is not reported in the same place as general revenue receipts and property taxes due to mid-year reorganizations.

For the following districts the total ADA for 1964-65 is reported in the existing district -- to the right -- but part of the general fund revenue receipts and property taxes for 1964-65 are reported in the dissolved districts. Consequently the general fund revenues and property taxes per ADA reported for the existing districts for 1964-65 are slightly low:

Dissolved During Fiscal Year 1964-65

SEE FOOTNOTES ON FOLLOWING PAGE

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
2. General fund expenditures for instruction include salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction.
3. General fund expenditures for administration include salaries, contracted services and other administrative expenditures.
4. General fund expenditures for transportation include salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures.
5. Expenditures for all other general fund purposes include expenditures for operation and maintenance of plant and equipment, fixed charges, attendance services, health services, food services, student-body activities, community services, capital outlay, and debt service.

* ADA for these districts is not reported in the same place as expenditures, due to mid-year reorganizations.

- A. For the following districts the total ADA for 1962-63 is reported in the new district but part of the expenditures are reported in the dissolved districts. Consequently, the expenditures per ADA reported for these new districts are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Arapahoe</u>	
#16, 23, 75, and Sheridan U.H.S.	2 (Sheridan)
<u>Conejos</u>	
#8 #18, 32	6J (Sanford) 13 (Capulin)
<u>Weld</u>	
#15, 24 #37, 90, 103 #34, 40, 46, 67, 131	6 (Greeley) Re - 2 (Eaton) Re - 9 (Ault-Highland)

- B. For the following districts the total ADA for 1962-63 is reported in the dissolved districts but part of the expenditures are reported in the new district. Consequently, the expenditures per ADA reported for these dissolved districts are slightly low:

<u>Dissolved</u>	<u>Included In</u>
<u>Montezuma</u>	
#5, 29	Re - 4A

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. General fund expenditures for instruction include salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction.
 3. General fund expenditures for administration include salaries, contracted services and other administrative expenditures.
 4. General fund expenditures for transportation include salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures.
 5. Expenditures for all other general fund purposes include expenditures for operation and maintenance of plant and equipment, fixed charges, attendance services, health services, food services, student-body activities, community services, capital outlay, and debt service.
- * ADA for these districts is not reported in the same place as expenditures, due to mid-year reorganizations.

For the following districts the total ADA for 1963-64 is reported in the new district but part of the expenditures are reported in the dissolved districts. Consequently, the expenditures per ADA reported for these new districts are slightly low:

Dissolved

250 TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
2. General fund expenditures for instruction include salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction.
3. General fund expenditures for administration include salaries, contracted services, and other administrative expenditures.
4. General fund expenditures for transportation include salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures.
5. Expenditures for all other general fund purposes include expenditures for operation and maintenance of plant and equipment, fixed charges, attendance services, health services, food services, student-body activities, community services, capital outlay, and debt service.

* ADA for these districts is not reported in the same place as expenditures, due to mid-year reorganizations.

For the following districts the total ADA for 1964-65 is reported in the existing districts -- but part of the expenditures are reported in the dissolved districts. Consequently, the expenditures per ADA reported for these existing districts are slightly low:

Dissolved During Fiscal Year 1964-65

SEE FOOTNOTES ON FOLLOWING PAGE.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING

1. General fund expenditures for instruction include salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction.
2. General fund expenditures for administration include salaries, contracted services and other administrative expenditures.
3. General fund expenditures for transportation include salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures.
4. General fund expenditures for operation of plant and equipment include salaries, contracted services, heat for buildings, utilities, supplies, and other; for maintenance of plant and equipment include salaries, contracted services, replacement of equipment, and other; and for fixed charges include employee retirement, insurance and judgments, rental of land and buildings, interest, treasurer's commission, and other fixed charges. All of these items have been combined for Column 5.
5. General fund expenditures for food services include salaries and other expenses plus amounts from the general fund to make up deficits in separate food service funds.
6. General fund expenditures for student-body activities include salaries and other expenses plus amounts from the general fund to make up deficits in separate activity funds.
7. General fund expenditures for community services include recreation, civic activities, public library, and welfare activities.
8. General fund expenditures for capital outlay include sites, buildings, and equipment (transportation and other); and for debt service include principal of debt (or overdraft), interest on debt, amounts paid into sinking fund, amounts paid as principal and interest to school housing authority, and other debt service. These items have been combined for Column 11.

* ADA for these districts is not reported in the same place as expenditures, due to mid-year reorganizations.

SEE FOOTNOTES ON FOLLOWING PAGE.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING

1. General fund expenditures for instruction include salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction.
2. General fund expenditures for administration include salaries, contracted services and other administrative expenditures.
3. General fund expenditures for transportation include salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures.
4. General fund expenditures for operation of plant and equipment include salaries, contracted services, heat for buildings, utilities, supplies, and other; for maintenance of plant and equipment include salaries, contracted services, replacement of equipment, and other; and for fixed charges include employee retirement, insurance and judgments, rental of land and buildings, interest, treasurer's commission, and other fixed charges. All of these items have been combined for Column 5.
5. General fund expenditures for food services include salaries and other expenses plus amounts from the general fund to make up deficits in separate food service funds.
6. General fund expenditures for student-body activities include salaries and other expenses plus amounts from the general fund to make up deficits in separate activity funds.
7. General fund expenditures for community services include recreation, civic activities, public library, and welfare activities.
8. General fund expenditures for capital outlay include sites, buildings, and equipment (transportation and other); and for debt service include principal of debt (or overdraft), interest on debt, amounts paid into sinking fund, amounts paid as principal and interest to school housing authority, and other debt service. These items have been combined for Column 11.

* ADA for these districts is not reported in the same place as expenditures, due to mid-year reorganizations.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING

1. General fund expenditures for instruction include salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction.
2. General fund expenditures for administration include salaries, contracted services and other administrative expenditures.
3. General fund expenditures for transportation include salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures.
4. General fund expenditures for operation of plant and equipment include salaries, contracted services, heat for buildings, utilities, supplies and other; for maintenance of plant and equipment include salaries, contracted services, replacement of equipment, and other; and for fixed charges include employee retirement, insurance and judgments, rental of land and buildings, interest, treasurer's commission, and other fixed charges. All of these items have been combined for Column 5.
5. General fund expenditures for food services include salaries and other expenses plus amounts from the general fund to make up deficits in separate food service funds.
6. General fund expenditures for student-body activities include salaries and other expenses plus amounts from the general fund to make up deficits in separate activity funds.
7. General fund expenditures for community services include recreation, civic activities, public library, and welfare activities.
8. General fund expenditures for capital outlay include sites, buildings, and equipment (transportation and other); and for debt service include principal of debt (or overdraft), interest on debt, amounts paid into sinking fund, amounts paid as principal and interest to school housing authority, and other debt service. These items have been combined for Column 11.

* ADA for districts in these counties are not reported in the same place as expenditures, due to mid-year reorganizations.

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. Total general fund expenditures per ADA, arranged in order of size of expenditure. General fund expenditures include instruction, administration, transportation, operation, maintenance, fixed charges, attendance services, health services, food services, student activities, community services, capital outlay, and debt service.
 3. Current expense per ADA, as shown by the State Department of Education. This includes all general fund expenditures except capital outlay, debt service, and community services. It also includes fixed charges from all other funds.
 4. General fund expenditures for transportation (includes salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures).
 5. General fund expenditures for instruction (includes salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction).
 6. General fund expenditures for administration (includes salaries, contracted services and other administrative expenditures).
 7. Expenditures for all other general fund purposes (includes expenditures for operation of plant and equipment, fixed charges, attendance services, health services, food services, student body activities, community services, capital outlay, and debt service).
- * For Weld County districts Re-10 (Briggsdale), Re-11 (Pawnee) and Re-12 (Grover) the total ADA for 1963-64 is reported in these new districts even though part of the general fund expenditures were reported in the dissolved districts from which they were formed. Consequently, the general fund expenditures per ADA for these three districts are slightly low for 1963-64.

See Footnotes on following page.

Table 20
(Continued)

1. ADA is the actual average daily attendance. The aggregate days of attendance have been divided by the number of days school was actually in session.
 2. Total general fund expenditures per ADA, arranged in order of size of expenditure. General fund expenditures include instruction, administration, transportation, operation, maintenance, fixed charges, attendance services, health services, food services, student activities, community services, capital outlay, and debt service.
 3. Current expense per ADA, as shown by the State Department of Education. This includes all general fund expenditures except capital outlay, debt service, and community services. It also includes fixed charges from all other funds.
 4. General fund expenditures for transportation (includes salaries, contracted services, replacement of vehicles, transportation insurance, payments in lieu of transportation, and other transportation expenditures).
 5. General fund expenditures for instruction (includes salaries for principals, consultants, supervisors, teachers, other instructional staff, and secretarial and clerical personnel; textbooks; school library and audio-visual expenditures; teaching supplies; and miscellaneous expenditures for instruction).
 6. General fund expenditures for administration (includes salaries, contracted services and other administrative expenditures).
 7. Expenditures for all other general fund purposes (includes expenditures for operation of plant and equipment, fixed charges, attendance services, health services, food services, student body activities, community services, capital outlay, and debt service).
- * ADA for these districts is not reported in the same place as the general fund expenditures shown in column 3 of the accompanying table, due to mid-year reorganizations. For the following districts the total ADA for 1964-65 is reported in the now existing districts -- in the column to the right -- but part of the general fund expenditures are reported in the dissolved districts -- in the column on the left. Consequently, the expenditures per ADA reported for the districts on the right are slightly low.

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. Transportation Expenditures per ADA are calculated by dividing total ADA into Total General Fund Expenditures for Transportation.
2. The figures for Transported ADA were obtained from the State Department of Education.
3. Transportation Expenditures Per Pupil Transported is calculated by dividing Transported ADA into Total General Fund Expenditures for Transportation.

* ADA for these districts is not reported in the same place as expenditures, due to mid-year reorganizations.

State Total		424,530.8				\$207,530,152	\$12,422,350	\$180,974,201	\$108,328,986	\$60,599,530	

TOTALS MAY NOT BE EXACT DUE TO ROUNDING.

1. WADA means weighted average daily attendance. It is found by dividing the aggregate days of attendance by 180 days with kindergarten counted as one-half day. Column (2) is based on the AgDA for 1964-65.
2. AV/WADA means assessed valuation per WADA. Column (3) is based on the assessed valuation for 1964.
3. ACE/WADA means the 1964-65 adjusted current expense per WADA. See footnote 5 for a definition of adjusted current expense.
4. This is the proportion of Column (8) that the state will pay. It is computed by subtracting Column (3) from \$23,392 and dividing the difference by \$23,392.
5. Adjusted current expense is total current expense minus transportation. Column (6) is based on the year 1964-65.

Footnotes continued on following page.

Table 22
(continued)

6. Other specific revenue includes the following:

Revenue from state sources:

Vocational education
Special education
Public Law 86-864 (NDEA)
Migrant education
Other revenue from state sources

Revenue from federal sources:

Mineral leases
Federal forest lands
Federal lands materials
Federal lands marginal
Flood control
Johnson-O'Malley Act
Public Law 874, except Sec. 4(a) amount
Other revenue from federal sources

The sum of these items for 1964-65 appears in Column (7) and is subtracted from Column (6) to find Column (8).

7. This is Column (6) minus Column (7), except that, prior to the subtraction, Column (6) must be reduced to the amount of the WADA times \$508.27 in each district having an ACE/WADA in excess of \$508.27.
8. State support for 1965-66 is computed by applying the state support ratio (Column 5) to the expense subject to equalization (Column 8).
9. This is the comparable amount of state aid under the present program. PSFA means Public School Foundation Act. PTRF means Property Tax Relief Fund. Column (10) shows the total state support for 1965-66 from these two sources under the present program. Transportation aid is not included.
10. Column (11) shows the actual 1964 property tax levy for the school district general fund and the county public school fund combined, with the approximate levy for transportation deducted. The approximate levy for transportation was computed by dividing the amount of transportation expense by the 1964 assessed valuation.

Table 23
(continued)

6. Other specific revenue includes the following:

Revenue from state sources:

Vocational education
Special education
Public Law 86-864 (NDEA)
Migrant education
Other revenue from state sources

Revenue from federal sources:

Mineral leases
Federal forest lands
Federal lands materials
Federal lands marginal
Flood control
Johnson-O'Malley Act
Public Law 874, except Sec. 4(a) amount
Other revenue from federal sources

The sum of these items for 1964-65 appears in Column (7) and is subtracted from Column (6) to find Column (8).

7. This is Column (6) minus Column (7), except that, prior to the subtraction, Column (6) must be reduced to the amount of the WADA times \$471.68 in each district having an ACE/WADA in excess of \$471.68.
8. State support for 1965-66 is computed by applying the state support ratio (Column 5) to the expense subject to equalization (Column 8).
9. This is the comparable amount of state aid under the present program. PSFA means Public School Foundation Act. PTRF means Property Tax Relief Fund. Column (10) shows the total state support for 1965-66 from these two sources under the present program. Transportation aid is not included.
10. Column (11) shows the actual 1964 property tax levy for the school district general fund and the county public school fund combined, with the approximate levy for transportation deducted. The approximate levy for transportation was computed by dividing the amount of transportation expense by the 1964 assessed valuation.

1. Column (3) shows the estimated 1966-67 state support from the present minimum equalization program (with no change in either the factor or the value of the classroom unit) plus the Property Tax Relief Fund if the amount per ADA were increased from \$40 to \$62.
 2. Column (4) shows the estimated 1966-67 state support if the minimum equalization program were revised to: (1) weight assessed valuation at 80% and adjusted gross income at 20%; (2) increase the factor to .0140; (3) raise the classroom unit value to \$7,575; and (4) raise the maximum amount a county would have to levy to \$6,200 per classroom unit.

Table 26

BASE IS \$475.00 ADJUSTED CURRENT EXPENSE PER WADA - STATE SUPPORT IS 60% OF DIFFERENCE BETWEEN \$475.00 AND AMOUNT RAISED PER WADA BY A DISTRICT LEVY OF 20 MILLS, WITH A MINIMUM OF \$10.00 PER WADA.

Grand Totals	424,530.8									\$73,932,578

1. Columns (1) through (6) are in terms of WADA.

2. Column (3) is taken from "Foundation Program IV" presented at last committee meeting, and is Adjusted Current Expense minus Other Specific Revenue, divided by WADA of district.

Table 26 (Cont.)

3. Amount in Column 5 is computed as follows (Mapleton) -

Base	\$475.00
Less Column (4)	<u>142.36</u>
Difference	\$332.64

 $\$332.64 \times .60 = \199.58
4. Columns (4), (5) and (6) are equal to Column (3).
5. Column (7) is sum of Columns (4) and (6), divided by Column (2).
6. Column (8) is taken from "Foundation Program IV" (last column).
7. Column (9) is Column (5) as a per cent of Column (3).
8. Computations are for foundation support only - no excess growth or small attendance center factors are included.

Table 27
